

# Antimicrobial Hygienic Tools

## Protection From The Dangers You Can't See

# Antimicrobial Additive

**Hillbrush offers a range of brushes and other cleaning equipment that contain the antimicrobial Biomaster additive, a silver based compound that prevents the growth of a wide range of bacteria, fungi and moulds. When microbes come into contact with the additive, the silver ions prevent them from growing, producing energy or replicating.**

Bacterial populations cannot grow in this environment, and in fact decline rapidly. Independent testing shows Biomaster treated products inhibit the growth of bacteria by up to 99.99% when tested against ISO 22196:2011. Biomaster reduces bacterial populations of Campylobacter and Staphylococcus by 80% after fifteen minutes, and by up to 99.99% after two hours.

The plastics, fibres and resin in our antimicrobial brushes all contain the Biomaster additive. The additive lasts as long as the product, and is not affected by time or abrasion. Our antimicrobial products are in a practical sense identical to the standard ones, they are equally effective, durable and hard wearing.

They are also available in six colours to help you with your HACCP, 5S or other colour coding systems, used to promote interdepartmental segregation and prevent cross contamination. One of the colours, purple, is offered nowhere else in our entire range, so should you need to, you can keep your antimicrobial cleaning tools visible and separate.

All our antimicrobial brushes are resin set as standard. For more information about the resin set process and the advantages it brings, see [hillbrush.com/resin-set](http://hillbrush.com/resin-set).

All components in our antimicrobial products are EU and FDA approved for food contact.

Hillbrush regards its antimicrobial range as a very effective barrier against microbial contamination, but not as a substitute for good housekeeping.

## Six Antimicrobial Colours

All products in the Hillbrush Hygiene range, including antimicrobial products, have the following characteristics:

- All components are FDA and EU approved for food contact
- The brush blocks are made of solid polypropylene, which is crack, chip and shock resistant
- All metal staples are stainless steel
- All plastic fibres are PBT polyester, which has great temperature resistance, good bend recovery and excellent durability
- All products are dishwasher safe
- Except where specified all products may be autoclaved at 135°C
- All products may be cleaned with standard disinfectants and surfactants
- Brushes and broom handles have convenient hanging holes
- Many colours are available to help you with HACCP, 5S and other segregation systems
- These are not throw-away products. Hillbrush manufactures products that are long lasting, durable and highly effective

# Antimicrobial Hygienic Tools

## 1360mm Aluminium Handle with Polypropylene Hand Grip & Thread

AMALH7

Anodised Aluminium threaded handle with a Antimicrobial coloured hand grip.

## Medium 305mm Floor Brush

AMB758

This is an excellent sweeping broom, ideally employed for heavy-duty general purposes.

## Stiff 305mm Deck Floor Brush

AMB770

Excellent for spot cleaning, designed for heavy use in highly food sensitive areas.

## Medium 457mm Floor Brush

AMB809

This heavy duty broom is ideal for wide, open areas.

## Stiff 457mm Floor Brush

AMB994

A good general purpose brush for bulkier debris, in wider open areas.

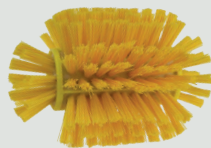

### One Piece Polypropylene Handle

AMPLH3

All-Polypropylene 1400mm handle. This is ideal for light to moderate use, but is not recommended for use with deck scrubs or wider (457mm) brooms.

### Stiff Bulk Tank Brush

AMD79

Ideal for cleaning tanks, vats and gullies.

### One-Piece Squeegee

AMPLSB60

This popular single-bladed squeegee is over moulded with a single rubber blade. It is seamless, very easily cleaned, light, durable and wonderfully effective. The rubber has a special oil resistant formula.

### Plastic Scraper - Medium

AMPSC1

This scraper is very good for moderate cleaning and use on smooth surfaces.

### Small Seamless Hand Scoop

AMSCOOP2

This lightweight but strong scoop comes complete with hanging hole. Capacity: 650ml/g.

### Plastic Shovel

AMPSH13

Metal free, very resilient, shock and crack resistant, very strong and easily cleaned.

### Plastic Scraper - Large

AMPSC2

This large scraper is very good for moderate cleaning and use on smooth surfaces.

### Large Seamless Hand Scoop

AMSCOOP4

This lightweight but strong scoop comes complete with hanging hole. Capacity: 2721ml/g.

### Dual Stiffness Double Wing Scrub

AMST5

The double wing design ensures maximum cleaning action on tough dirt, even in difficult to reach corners.

### Open Dustpan

AMDP13

This tough, robust dustpan is made with impact resistant polypropylene for food contact environments. The plastic is 3mm thick, to ensure absolute straightness.

### Soft Banister Brush

AMB866

A light, agile, well filled brush great for cleaning dust and crumbs.

### Stiff Short Handled Brush

AMD4

Designed to work and to last. The angled material at the sides and front allows for cleaning in hard-to-reach corners.

### Stiff Banister Brush

AMB867

Designed for heavy use in highly sensitive food areas. Agitates and removes compacted debris.

### Complete Bucket

AMMBK15/SET

A set of AMMBK15 and AMMBK15/LID.

### Bucket Only

AMMBK15

12l bucket. The bucket has internal capacity measurements, is base-banded for stability and durability, has a splash free lip and a base hold for easy pouring.

### Lid Only

AMMBK15/LID

Optional Antimicrobial lid for the AMMBK15 bucket. It is hinged, and cannot be detached by accident. Antimicrobial purple only.

### Overmoulded Hanger

AMWLBR1

This hanger has four hanging spaces, it's all-plastic, smooth and easily cleaned. The Polypropylene base is strong, shatter resistant and flexible. The black TPR overmoulded surface gives very good grip.

## Marketing Support

We are proud of our distribution network and want to support all our partners as best we can. The Hillbrush marketing department is here to help. We have an extensive library of images, marketing assets and videos to support our distributors in promoting Hillbrush products. Please contact [marketing@hillbrush.com](mailto:marketing@hillbrush.com) for any additional support not documented at the QR codes below.

# Planet & Purpose Sustainability

**We are a company that takes responsibility for our products & our people with a clear sustainability mission:**

- ✓ To make our world a cleaner and more sustainable environment to work, live and play in, through our high-quality innovative products and services
- ✓ We strive to do more good for our planet and our society - not just less harm

From 100% fully recycled products, to using less raw material in manufacturing, we are constantly looking at ways to integrate sustainability into the design of our products. We continually replace old production machines with new ones which are far more energy efficient.

## Beyond Sustainable

Put simply, deep thinking is not enough when it comes to creating a sustainably focused business. We have initiatives that we're working on currently which include:

- ✓ Innovating and redesigning products to use less raw material
- ✓ Extending our LED lighting system to 100% factory site
- ✓ 14001 Certification
- ✓ B Corps Certified Company Accreditation
- ✓ Extending beyond scope 1 and 2 carbon accounting to scope 3

**Do you have questions about our sustainability?**

Our sustainability team is available to help. We can guide you if you have questions about any of our products and the best environmentally led solution for your needs
