# Janitorial Ranges

Our range of cleaning products caters to a diverse set of cleaning requirements for janitorial, council and commercial applications.

- ✓ **Robust and Eco-Friendly Equipment:** Designed to withstand and excel in challenging environments
- ✓ **Ideal for Commercial Environments:** Perfect for schools, offices, and facilities management, our products are well-suited for commercial settings
- ✓ **Wide Range of Products:** Our collection includes brushes, telescopic handles, litter picking tools, and floor care equipment
- ✓ **Complete Solutions:** Our range offers complete solutions for various cleaning needs, ensuring all aspects are covered

Our janitorial equipment is perfect for facilities management, council & commercial cleaning, including this bag hoop (*Fully Recycled Bag Hoop; black only*)

Hillbrush's traditional range sets the standard for brushes in the market. Since 1981, we've held a Royal Warrant, supplying brushes to the Royal Households

## Traditional Ranges

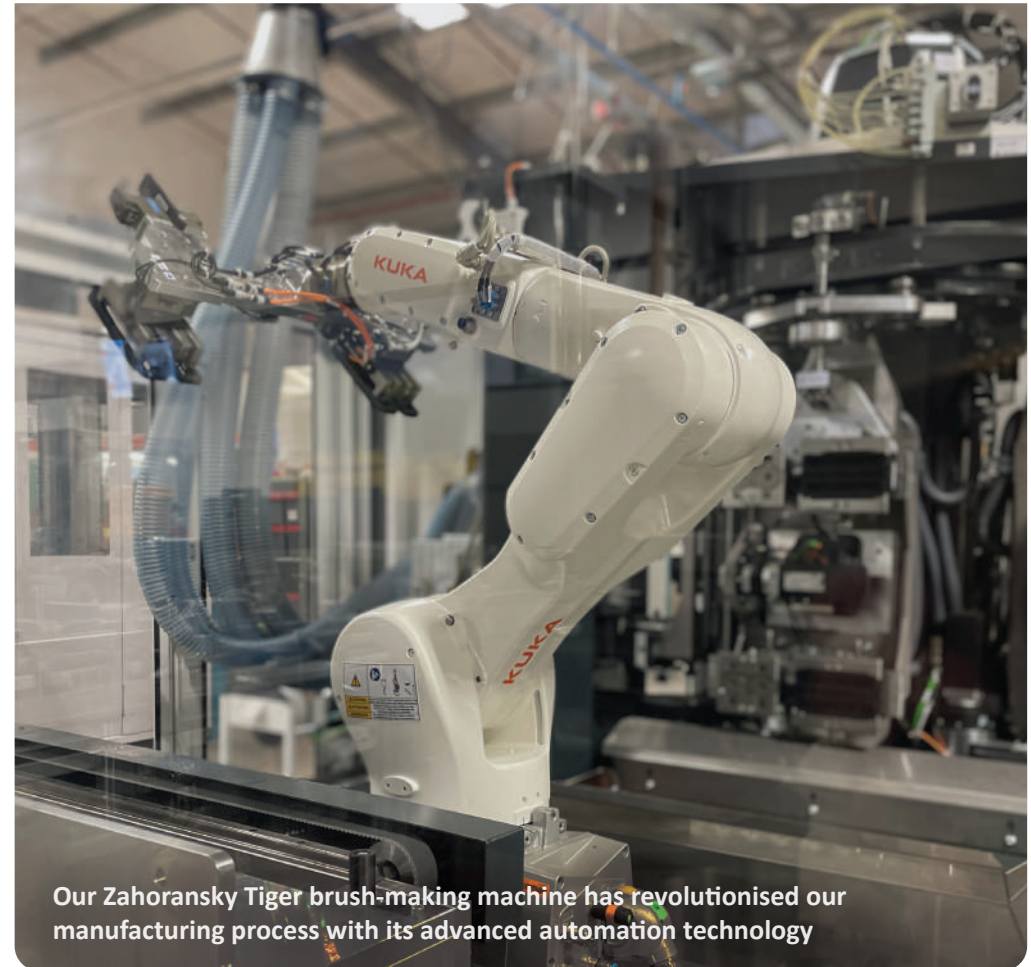

With meticulous British craftsmanship and a commitment to sustainable practices our FSC™ certified range of brooms and brushes combine the timeless appeal of traditional designs with sustainable materials.

- ✓ **Trusted heritage** as a manufacturer of traditional cleaning brushes and equipment
- ✓ **Broadest selection** of traditional high-quality cleaning tools
- ✓ **Strong brooms & brushes with natural fibres** for durability & versatility across various environments
- ✓ **Cost-effective solutions** without compromising on quality or performance
- ✓ **Excellent customer support** with product guidance

# UK Brush Manufacturing Partners

We offer **bespoke brush-making** at our Wiltshire based UK facilities.

- ✓ **Work with our design team** from concept to manufacture
- ✓ **Advice** on best performing materials and manufacturing methods to suit your needs
- ✓ **Advanced fibre dressing** and mixing machines, giving our customers a better quality of end product
- ✓ Capability to use more than **eight different natural fibres**

Our Zahoransky Tiger brush-making machine has revolutionised our manufacturing process with its advanced automation technology

Product design capabilities from our UK based HQ

# Injection Moulding Capabilities

We offer British quality-made **injection moulding** capabilities within our state-of-the-art design centre, with machines from 90 to 1,000 tonnes.

- ✓ Helping to re-shore production with a British supplier whilst giving you reassurance over financial outlay and quality control
- ✓ Product design capabilities from our UK based HQ
- ✓ Dedicated technical support team

# Injection Moulding Production

Integrating plastic injection moulding into your project with Hillbrush.

- ✓ Allow for **complex geometries** with tight tolerances and large volumes
- ✓ Choose from a **wide range of materials and colours**
- ✓ Benefit from our **highly efficient systems and reliability**
- ✓ Access to regrinding and re-purposing of stock
- ✓ Potential to use recycled material

Our 1000 tonne injection molding machine is known for its precision and efficiency in producing large-scale parts

## Planet & Products

Hillbrush is committed to innovation and sustainability, constantly striving to develop new and improved cleaning products while minimising their environmental impact. Distributors can align with these values, attracting environmentally conscious customers.

- ✓ Our ECO Range revolves around sustainability. It consists of products that contain at least 80% recycled materials
- ✓ We manufacture using recycled material. Recycled plastic is supplied by our sustainability award-winning supplier
- ✓ We offer assurance that your products are being manufactured in a way to limit environmental impact without compromising performance

# Solar & Recycling

Since 2016, our solar energy system covering 5,500m<sup>2</sup> has reduced reliance on fossil fuels. At least 75% of our electricity now comes from sources with zero carbon footprint. We have increased the tonnage of materials that we recycle by 84.9%.

- ✓ At least 75% of our electricity comes from sources with zero carbon footprint
- ✓ Reduced waste sent to landfills and incinerators
- ✓ Help to conserve natural resources

Our head office in Mere, Wiltshire, UK

## Beyond Sustainable

Put simply, deep thinking is not enough when it comes to creating a sustainably focused business. We have initiatives that we're working on currently which include:

- ✓ Innovating and redesigning products to use less raw material
- ✓ Extending our LED lighting system to 100% factory site
- ✓ 14001 Certification
- ✓ B Corps Certified Company Accreditation
- ✓ Extending beyond scope 1 and 2 carbon accounting to scope 3

Rising demand in the construction industry necessitated a UK manufacturing partner for 'SureCav's Lightweight, rain-blocking alternative to backing blocks. Enter Hillbrush, with their injection moulding capabilities and 24/7 operations
