FloorZilla diamond

green • yellow • red • black

FLOOR ZILLA

Product details

Height	approx. 20 mm
Diameter	7–20'
Material	Nonwoven fibres, foam material
Coating	VreactiV Diamond
No. of pieces	3 pcs (sales unit)

Use with cleaning machines

FloorZilla cleaning pads are compatible with oscillating and rotating single disc machines as well as scrubber dryers.

Sustainable and climate neutral

Cleaning specialists use FloorZilla as a sustainable contribution to protecting the environment, as FloorZilla cleaning pads are made of recycled material and produced in Germany with net-zero carbon emissions. Dirt is removed completely without chemicals. Water consumption is reduced by up to 50%. Our customers' success is a success for everyone – sparkling floors with a demonstrable cut in CO₂ emissions by more than 33%.

MADE IN GERMANY

Flooring

FloorZilla diamond is suitable for use on both hard and resilient flooring*:

- Natural stone
- Terrazzo
- Marble
- Screed/concrete
- Industrial flooring
- Epoxy resin
- Polyurethane
- Linoleum
- PVC

* Product compatibility must always be checked before use.

3D active elements (diamond)

Deep-cleaning and highly efficient:

VreactiV technology with the 'diamond' coating enables highly effective floor treatment during basic and maintenance cleaning. Hard floors are grinded, polished and compacted in just a few steps and acquire a new gloss. The coating on resilient floors is removed in just one step and entirely without chemicals.

Higher contact pressure

Not only do the 3D active elements in FloorZilla 'diamond' cleaning pads ensure optimised pressure distribution, they also enable increased contact pressure. The raised 3D active elements allow four times the contact pressure to enable a powerful polish while sliding easily across the floor for more comfortable work.
