

KÄRCHER

A SOLUTION FOR EVERY TASK

Achieve more together. [karcher.com](https://www.karcher.com)

PROFESSIONAL | CLEANING SERVICE PROVIDERS

ALL FROM A SINGLE SOURCE

Kärcher is the worldwide leading full service provider of cleaning solutions, offering fair and transparent financing concepts as well as advice and services tailored to your needs. Achieve optimal cleaning results using innovative products, specially formulated cleaning agents and an extensive range of accessories.

THE BEST IN THEIR CLASS

FlexoMate cleaning trolley

No time for compromise: the FlexoMate ExpertPro is compact and flexible and helps finish all your cleaning tasks even more quickly. The height-adjustable handles, tilting and pull-out modules and the easy manoeuvrability help reduce the strain experienced by your employees and make work more efficient.

B 50 scrubber dryer

The B 50 W Bp compact scrubber dryer is ideal for efficient floor cleaning and boasts a particularly robust design. The brush head and squeegee are made from long-lasting cast aluminium – for excellent suction even on structured surfaces and in tight bends.

BVL battery-powered backpack vacuum

No concessions or limits, just power: reach all areas with the ultra-light, powerful, battery-powered BVL 5/1 Bp Pack backpack vacuum – even when cleaning in the narrowest of spaces. All without having to wind up or unwind the power cable, drag it behind you, snagging or endless replugging.

Be invincible with this cleaning fleet and perform every (cleaning) task without any problems. Customer satisfaction is our top priority: We offer our customers innovative products and machines so that they can achieve their goals more quickly, efficiently and effortlessly.

CVS vacuum sweeper

Cleaning with a vacuum cleaner can be hard work and take time. We can help. The battery-powered CVS 61/1 carpet vacuum sweeper gives you high cleaning performance and is easy to operate. It can help you clean long corridors and large carpeted areas quietly and without interruptions.

BR 30 scrubber dryer

Using a mop and bucket is now a thing of the past. Achieve a high level of hygiene, better floor cleaning and maximum comfort using the powerful BR 30/1 C Bp scrubber dryer. And why not help the environment too - the machine is sustainable and conserves resources.

KIRA scrubber dryer robot

The perfect addition to any cleaning team: the KIRA B 50 cleaning robot with intuitive operation and powerful sensors offers complete autonomy for high productivity and outstanding safety.

FIRST IMPRESSIONS COUNT

Strong outdoor performance: Kärcher offers flexible, convenient and efficient solutions for demanding cleaning tasks in outside areas.

Up, up and away? Or keep your feet firmly on the ground? From cleaning the surfaces of façades, windows, various other surfaces, streets and car parks, to maintaining green

spaces – Kärcher products help keep outside areas clean all year round and make a brilliant (first) impression.

Dirt prevention

The cleaner an outside area is, the less dirt will be carried inside. This means that the entrance area is cleaner by default and the effort required for cleaning is reduced, thus saving you money.

Top performance

Kärcher products are equally impressive in outside areas, whatever the weather conditions or surfaces and however stubborn the dirt may be. Our outdoor machines boast ergonomic, easy operation, maximum

flexibility and strong performance. We give you: innovative sweepers, battery powered products such as efficient leaf blowers, precise hedge trimmers and façade and high pressure cleaners.

Prefer to hire instead of buy? No problem

From spring cleaning to winter service: Kärcher municipal equipment offers application-optimised solutions for greater cleanliness. An additional advantage is that Kärcher Services allow you to hire municipal machines each season.

COME ON IN!

A clean entrance area will benefit not only your image, but also the health of your employees and visitors.

Your lobby says a lot about your business – this is where all clients, business partners, employees, visitors and candidates enter and

exit the building. This makes the entrance area one of the busiest places, and it is also where people bring in dirt on their shoes.

The right machine for every surface

Our battery-powered machines are fast, flexible and easy to use. Their compact and ergonomic design makes it easy to clean glass and floor areas. Whether cleaning carpets or hard floors, our products allow for cleaning close to the edges and agile cleaning even in areas filled with objects and furniture as well as nooks and crannies that are difficult to reach.

Cleaning contact surfaces

Frequently touched surfaces, such as door handles or lift buttons, can be found in the entrance area. These touch points should be cleaned and disinfected very often with appropriate cleaning agents.

A CLEAN SWEEP

Office areas are as versatile and individual as the workstation of each and every employee – and therefore have the cleaning requirements to match.

The workstation is each employee's place of work. Yet the COVID-19 pandemic has been a game-changer in terms of work requirements. As more and more colleagues work

from home, offices are being used considerably less. However, cleanliness and hygiene requirements are increasing.

Cleaning on demand

Using digital products helps determine the level of office use, which in turn enables targeted and needs-based cleaning.

Quick and flexible

Clean offices and conference rooms make office workers happy, while quick and ergonomic cleaning makes cleaning staff happy. Our machines clean all surfaces

in no time at all. Remove dirt on desks, upholstered furniture and keyboards using the powerful and quiet battery-operated vacuum cleaner. Clean areas filled with objects quickly using a vacuum cleaner and remove stubborn dust in carpets at the same time. Clean and disinfect contact surfaces using appropriate cleaning agents and disinfectant.

ENJOY THE FEEL-GOOD FACTOR ON YOUR BREAK

Hygiene in kitchens and canteens is of utmost priority. This is why Kärcher offers all you need to carry out professional cleaning while complying with strict hygiene regulations.

For many employees, the canteen is a beloved haven. It is where people get together for lunch, take a break to grab a coffee, have a quick catch-up and enjoy a short break from work. The canteen gets especially busy

around lunchtime. This results in a quick turnover of tables and their occupants. It also means that these areas must be cleaned quickly and regularly.

Drinking water to take away

The lunch break is a great opportunity for networking with your colleagues. And that works best before, during or after lunch with a glass of water. The Kärcher water dispenser lets employees enjoy healthy filtered drinking water.

Kitchens and canteens

Whether you are preparing food or consuming it, hygiene is of paramount importance in all food-related areas. At Kärcher we trust in targeted steam cleaning in kitchens without using chemicals. Scrubber dryers help combat food residues and crumbs in canteens. Combine two work steps into one with Kärcher: the perfectly matched roller technology not only eliminates preparatory and finishing work, but also allows you to sweep and wipe all floors quickly and easily.

NO PLACE FOR GERMS

Extensive cleaning and disinfecting can be so simple – even in sanitary facilities.

There are many reasons why careful cleaning is required in sanitary facilities: depending on the environment, many people use toilets in office buildings, production facilities, hotels or restaurants. This inevitably leads

to people's skin coming into contact with various different surfaces, such as door handles, taps or toilet flush buttons. Defined cleaning sequences aim to avoid the transmission of microorganisms.

Full steam ahead to tackle dirt

Highly effective steam cleaners offer everything you could possibly want in terms of hygiene. The steam emerges in very fine drops and, depending on the machine type, at a temperature of around 100°C and a pressure of up to 8 bar. You can clean walls, floors and furniture effectively, and the steam also reaches areas that are difficult to access such as rubber folds or crevices.

Sustainably clean

Particular care must be taken in sanitary facilities as it is likely that the various materials will have different reactions to the cleaning agent. This is why only basic/alkaline cleaning agents are used, allowing for gentle, eco-friendly and effective cleaning.

Upgrade your crew!

Our professional FlexoMate cleaning trolley ensures greater speed and efficiency in the cleaning process. The flexible and modular trolley is suitable for comprehensive cleaning tasks as well as diverse customer requirements. With its ergonomic structure and height-adjustable handle it reduces the physical effort and relieves shoulders and wrists.

HALL'S WELL, ALL'S WELL

For professionals from professionals: we provide the power and class that you expect.

Optimal quality and productivity can only be achieved when processes and products go hand in hand. This also applies to cleaning.

Only when machines, accessories and cleaning agents are compatible and used together can the best possible cleaning results be achieved.

In manufacturing, all types of dirt must be removed quickly and effectively. At the same time, it is important to guarantee the highest level of safety and ensure product quality without interrupting the production flow.

Excellence in all disciplines

From production systems, areas and walkways to narrow and large areas, the fields of application in industry are varied and complex. This is why our

cleaning aids must deliver the best power, without compromise and around the clock. Dirt in systems, such as production residues or greasy oils, need to be removed immediately. Only those who properly clean the machines they have invested in will spot damage early and be able to use their machine for longer. Fluids and oils can jeopardise occupational safety in halls and walkways as well. This is where compact and powerful cleaning machines can help.

LET'S GET TO WORK - WITH THE RIGHT MACHINES

Logistics is a high intensity area and consequently produces a lot of dirt.

In logistics, time and precise coordination are everything. However, the necessary cleaning of storage areas, vehicles and offices should not cause any disruption.

We offer cleaning solutions that help complete this work efficiently, so that deliveries continue to run smoothly instead of being at the mercy of dirt.

Nothing but the best for your warehouse

Booming business equals a lot of dirt. Whether it is leftover packaging, marks left by vehicles or simply dirt, Kärcher cleaning solutions make sure that your stock retains its quality. Cleaning in narrow corridors and in between high shelves requires compact machines with a high level of manoeuvrability and protective roofs to ensure the required level of safety. Powerful machines keep your surfaces clean, including every nook and cranny.

Large areas, great efficiency

Outside areas are exposed not only to everyday dirt produced by the company, but also the elements. Yet Kärcher's powerful cleaning machines, such as high pressure cleaners, vacuum sweepers and industrial vacuums easily remove marks left by vehicles, dirt, dust, rain and snow.

AUTONOMOUS CLEANING

Reliable sensor technology, connectivity and transparency meet complete cleaning performance – this is the new smart KIRA B 50 cleaning robot. Start a (clean) new chapter with the professional scrubber dryer robot: easy to set up and operate, it offers complete autonomy and facilitates safe, thorough and economical cleaning of all surfaces.

WHAT IF THE FUTURE OF CLEANING CHANGES TOMORROW?

No matter how radically your business changes, we can help you to keep up with the challenges ahead. Just reach out to us to reach for the stars. **Nothing can stop you. With Kärcher Services.**

SUSTAINABILITY MAKES THE DIFFERENCE

At Kärcher, sustainability is an aspiration and driving force.

This is why we not only impress with our powerful cleaning systems but also take responsibility: for the environment, our products, the supply chain, society and our staff.

ZERO EMISSIONS

Setting the course for climate protection

As a leading, climate-friendly company in our industry, our factories worldwide have been using green electricity for production since 2021. To reduce our carbon footprint, we save energy and invest in efficient systems and buildings. Because sustainability does not end at the factory gates for Kärcher, we also look at emissions from upstream and downstream activities.

REDUCE, REUSE, RECYCLE

Focus on conserving resources

We design our cleaning systems to be as environmentally friendly as possible, from manufacture and use right through to disposal. The aim is to reduce primary raw material use by procuring materials from sustainable sources, increasing the proportion of recycled plastic in products and manufacturing long-lasting machines. We are also working on sustainable packaging and preventing plastic waste.

SOCIAL HERO

Responsibility is our compass

In our supply chain, we also value environmentally friendly behaviour, long-term relationships, strict social standards and transparency. We follow clear criteria against which we measure ourselves and our partners. We take social responsibility seriously and therefore fund organisations and individuals who advocate for nature, culture and society.

You can find more information about the topic of sustainability in the company at [karcher.com](https://www.karcher.com)
