**The new solution of Concentrated
Cleaners for dilution**

REVOLUTION IN CONCENTRATED PRODUCTS

EFFICIENT, CLEAN, SIMPLE & GENERATE GREAT SAVINGS

Integrates two independent Venturi systems for filling (1) spray bottles & (2) mop buckets into one single equipment. Workers can use 7 different concentrated products. One single Installation.

ONE SINGLE DOSING EQUIPMENT

“A reliable & profitable new solution for concentrated cleaning chemicals”

It prevents unwanted manipulations on the dosing system and undesirable accidents changing the canisters. It guarantees a precise dosage each time, making maintenance of the dispenser practically unnecessary, as there will be new metering tips inside each canister. It also reduces the initial investment needed, by acquiring only one dispenser for every cleaning chemical products available on this range.

The metering tips are allocated inside each plastic bottle, at the base of the suction cannulas, instead of being inserted into the suction tubes of the dosing dispenser

The valves inside the plastic bottles are tamper-proof and allows filling (1) spray bottles and also (2) mop buckets. Dosage comes already calibrated ex-factory.

The auto-suction reservoir deposit avoids mixing chemicals in the dilution process.

- ✓ Quick installation
- ✓ Minimum space
- ✓ One single dispenser
- ✓ Exact dosage per each dilution
