

POD MK3

For a superior hand drying experience

Pod MK3 is the newest auto cut paper dispenser with one of the largest paper capacities on the market.

Its new mechanism has been designed for optimised cutting of various paper lengths and plies.

The patented reserve roll loading system prevents paper shortage and waste.

- Compact size and modern design that integrates the Ellipse range
- Patented chevron paper cutting design
- Made of durable ABS material and stainless-steel blades
- Single use paper portion for optimal hygiene
- Easy and fast loading of paper rolls
- Easy installation and minimum maintenance

AUTO POD

Automatic reserve paper roll dispenser

This modern unit provides superior hand drying experience by automatic paper delivery via capacitive sensing and single use paper portion – the paper self presents. Economical, durable, and hygienic, it is the perfect choice for commercial washrooms, healthcare, and food processing areas.

The Auto Pod is an excellent choice for efficient and economical hand drying, while providing maximum hygiene to the end user:

- Designed for a variety of paper rolls with different lengths; 1 and 2-ply paper rolls, which allows freedom and control of consumables
- The changeable paper length and presentation modes eliminate the risk of cross contamination
- Robust and reliable unit made of durable ABS and with long-lasting batteries
- Easy to install, service and maintain
