## RUBBERMAID COMMERCIAL PRODUCTS

Rubbermaid Commercial Products (RCP) are there to be relied upon. Our products are designed to outlast the competition, saving you money, protecting your staff and facility users from injury, whilst supporting their health and wellbeing.

Durability in every design means RCP products reduce the unnecessary waste that's created by lower quality, shorter-term alternatives.

Find out more about what RCP can do for your business here:

<https://www.rubbermaid.eu/en/about-us/>

BICSc members can request a free consultation from one of our experts to take a closer look at how we could save you money on your waste, washroom and cleaning essentials. Leading logistics company, DPD, saved 27% on their waste management costs by implementing Slim Jim Recycling Stations; we're confident we'll be able to support efficiencies in your business too.

## SMARTWORKPLUS

SmartWorkPlus help cleaning companies win business and retain happy customers by reducing costs and increasing margins whilst improving quality of service. Environmental sensors help focus resources only where needed by tracking how any building is being used through occupancy, heat and light detection.

Our GDPR compliant software & customised

user portal, aligns with BICSc productivity rates to measure cleaning rates per space, occupancy, heat & light usage. We give you the power to tailor staffing levels both at janitorial level & nightly cleans to match actual needs. Our ability to track where your customers may be heating and/or lighting rooms that are not occupied can identify energy wastage on a daily, weekly, monthly or annual basis. Not only does this help reduce energy spend but also plays a huge part in hitting any organisation's sustainability goals.

Measuring a room's occupancy levels ensures the correct size of room is being allocated to the volume of people it is needed for, and in a world where hybrid working rates have soared we can measure how effective a space or desk is being utilised, allowing space management to be optimised.

Exclusive offer for BICSc Members:

SmartWorkPlus are pleased to offer our Full Platinum Service including cleaning analytics for the price of our Bronze package. To find out more – [click here](#), fill out the form and one of our team will be in touch to discuss your business needs and how we can help.

## HMCA

A special offer to provide private medical plans for members of The British Institute of Cleaning Science has been arranged with HMCA, including a £50 gift card or £100 off your first-year subscription upon joining a private medical plan.

If you already have a private medical plan, are you paying too much? You could save money by transferring to HMCA. Why not request a no obligation quote ahead of your renewal? You may transfer to HMCA at any age, without a medical examination and will receive guaranteed acceptance under our transfer facility.

This offer is also available to you if you do not currently have private medical cover. With hospital waiting lists at a record high, there has never been a better time to start a private medical plan.

HMCA offer four levels of private medical plans for individuals, family groups and companies as well as dental plans, hospital cash plans, travel plans and vehicle breakdown recovery. Our many years of experience ensures we have a plan to suit your needs at the best possible price.

Who are HMCA?

HMCA was established over 45 years ago and has grown to be one of the most successful membership benefit providers in the UK. HMCA membership is also one of the most exclusive as our plans are only available to the members of trade, professional and membership groups and subscribers of select publications. Therefore, HMCA is not on any comparison website. You will not see HMCA advertising to the general public and this means minimal marketing costs so we can arrange comprehensive and flexible medical plans that are great value for money.

For further information and quotations contact HMCA by telephone on 01423 799949 or visit the exclusive HMCA The British Institute of Cleaning Science website here:
