

Aquatabs

Single dose disinfection tablets
Human Drinking Water

Diarrhoeal diseases are the second leading cause of death in developing countries, and responsible for 9% mortality rate in children under 5, accounting for approx 525,000 annual deaths.

What causes Diarrhoea?

Diarrhoeal diseases are caused primarily, by bacterial and viral pathogens like cholera, shigella and rotavirus. The prevalence of diarrhoea is associated with unsafe drinking water, malnutrition, poor sanitation and hygiene.

Diarrhoea is preventable and can be managed with low-cost interventions such as **Aquatabs®**

What are Aquatabs

Aquatabs are NaDCC effervescent tablets that disinfect contaminated water.

Aquatabs kill microorganisms to prevent cholera, typhoid, dysentery and other water borne disease.

Aquatabs Benefits

Aquatabs are simple to prepare, use and are easy to store & transport.

A single dose tablet that gives exact dosage, every time.

How can Aquatabs help?

Even after filtration, many water sources throughout the world remain contaminated and require some form of disinfection.

Aquatabs effervescent tablets which kill microorganism in water are the most cost effective disinfection solution for emergency situations and are approved by the WHO (World Health Organization) for use in communities, schools, healthcare facilities etc.

Enabling communities without access to water disinfection systems to benefit from the advantages of chlorination in a speedy and cost effective manner.

Aquatabs are also used for recreational activities like trekking and camping.

AQUATABS SINGLE DOSE TABLETS ARE SO EASY TO USE.

Tablet Size	Volume of Water (Litres)	
	Emergency 5ppm	Household Water 2ppm
3.5mg	-	1
8.5mg	1	-
33mg	4-5	10
67mg	8-10	20
67mg HWTs	-	20
167mg	20-25	-
1.67gm	200	500
2.5gm	300	750
5gm	600-750	1500
8.68gm	1250	2500

First check to see if the water is turbid (dirty).

Ensure to filter the water through a cloth if sediment is present.

Then disinfect as follows:

- Simply select the tablet size for the volume of water to be treated
- Add the tablet to the water
- Wait at least 30 minutes
- Enjoy the benefits of safe drinking water
