## WITH THE RIGHT AGENTS YOU CAN HANDLE ANY CLEANING TASK

Every day brings many challenges in relation to cleaning and hygiene - and also in terms of increasing demands for efficiency and quality of work. And regardless of the tasks you need to solve, you probably have an opinion about use (and consumption) of detergents and the environment around you - so do we.

We have divided our catalogue according to where the task is to be solved. Is it sanitary cleaning, kitchen or perhaps floor care? You might want to see our full range of Nordic Ecolabelled cleaning products? In the table of contents on page 7, you can easily get an overview of where to find exactly what you are looking for. The color of the bar in the Table of contents is repeated on the corresponding product pages.

If you also like to see our selection of accessories, we have created a separate catalogue for these. However, a small selection of our accessories are to be found on the last pages in this catalogue. Feel free to contact customer service if you would like a copy of our catalogue with accessories. Alternatively, you can find both catalogues on our website.

## SAFETY DATA SHEETS — WHEN YOU NEED THEM!

[WWW.NOVADAN.DK](http://WWW.NOVADAN.DK)

The requirements are that you must always have access to a safety data sheet. Novadan offers you online access to all product information and safety data sheets on our website.

Scan the QR code above, and you will be taken to our website where you can find them. You can either search by product name or item number and download the information you need.

On our website you can also download information about our products in the form of catalogues, brochures, flyers, cleaning guides, etc.

**NOVADAN®**

# PRODUCT NAMES

The product names consist of a name, an abbreviation and a number. Below you can see a list of abbreviations and their corresponding meaning. The number symbolizes dosing requirements - see below. Furthermore, the 700-series is with the Nordic Ecolabel.

PRODUCT DESCRIPTION	ABBREVIATION
Contains Chlorine	CL
Contains wax	W
Contains perfume	F
Well suited for aluminium	Alu
Powder	Powder
No phosphate	NP
Optic bright	OB

DOSAGE	PRODUCT FIGURE
Higher dosage	100
Medium dosage	300
Lower dosage and Nordic Ecolabel	700

## THE CUSTOMER’S IN FOCUS

For Novadan, the customer’s needs has always been the general focus and the cooperation with our customers is a priority. We offer a competitive product range of detergents and disinfectants, which effectively and environmentally cover our customers’ needs.

## A COMPETENT PARTNER

Novadan attaches great importance to being a competent partner for solutions of any cleaning task. We provide cleaning and hygiene solutions for both private and public companies where quality cleaning plays a crucial role.

## HIGH SERVICE LEVEL

We place great emphasis on ensuring our customers a high level of service in the form of technical service and advice from our experienced staff.

## INNOVATION AND GROWTH

Novadan is an innovative Danish production and service company that was established in 1980. We have a modern laboratory and own production facilities in which we develop and manufacture a wide range of quality products for cleaning, washing, laundry and disinfection. In these areas, our products are among the leaders in the market.

# PH-SCALE

A product's pH value tell whether the product responds acidic, neutral or alkalic. Strong acidic cleaners that work against limescale and corrosion, have a pH value close to 0, and highly alkaline cleaners for degreasing have a pH value close to 14. The neutral agents are in the center of the scale, where a pH of 7 is neutral, similar to water.

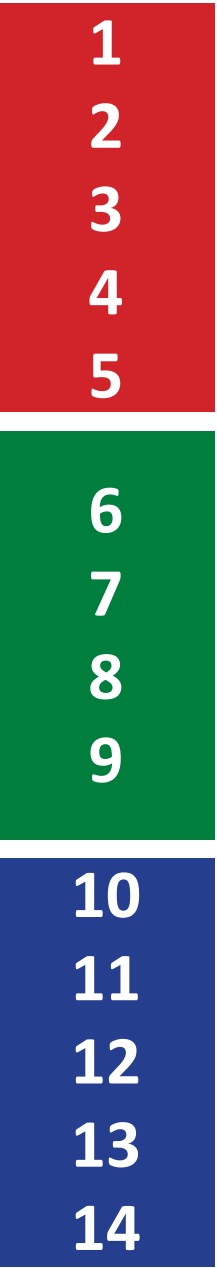

Our labels have colors which reflect the colors of the pH scale. Therefore, it is always easy to recognize whether a product is acidic, neutral or alkalic. Furthermore, we have products with yellow labels. The yellow color is not part of the pH scale but indicates that the product is a disinfectant.

**STRONG ACID  
(ACID WASH)**  
Hydrochlorid acid 30%  
Acetic acid  
Household acetic acid  
Buttermilk  
Yoghurt  
Soft drink, Beer  
**SLIGHTLY ACID**

**NEUTRAL**  
Whole milk  
Water  
Soda

**SLIGHTLY ALCALIC**  
Soap flakes  
Ammonium chloride  
**STRONG ALCALIC (DEGREASER)**  
Corrosive chloride  
(=sodium hydroxid)

**ACIDIC**  
Acidic cleaners are used to remove lime deposits and rust. Acidic cleaners can damage enamelled iron surfaces, chrome-plated objects and jointing in tiled walls and terrazzo floors. These agents may only be used in working solutions and must immediately be rinsed with clean water.

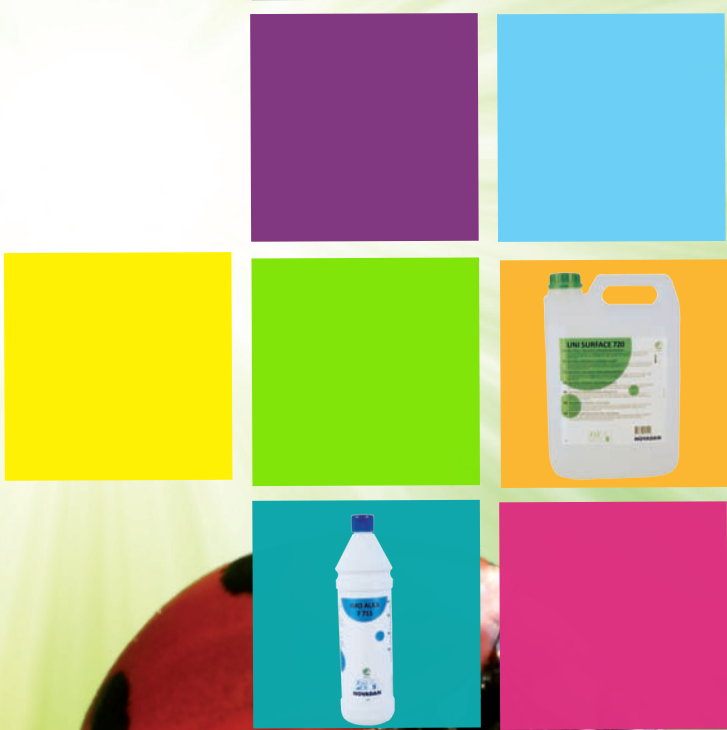

**NEUTRAL**  
Neutral detergents are used for light cleaning of inventory, tiled walls, kitchens, dishwashers, painted walls and surfaces. Neutral agents are also used for the cleaning of surfaces which neither tolerate the exposure to highly acidic or highly alkaline cleaners.

**ALCALIC**  
Alkaline cleaners are used for both light and thorough cleaning. Alkaline cleaners are particularly well suited to remove fats, as the fat is converted to more soluble compounds. Highly alkaline cleaners should not be used on linoleum.

Uni Steel Spray 324	500 ml		Carton	12	432	26041

# WIPES

## WIPES

Product	Weight	Ecolabel	Packaging	Per colli	Pallet size	Item no
IPA SPRIT 70% is a disinfectant based on alcohol for application in the food industry and the health sector. Approved for disinfection without subsequent rinsing by the Danish Veterinary and Food Administration. IPA SPRIT 70% evaporates quickly which makes it especially well suited for wiping of surfaces, machines and equipment which are in contact with food. Used in connection with for example product code change and disinfection after ATP measurement. In order to reduce risk of infection, disinfection with IPA Sprit 70% on surfaces in general is recommended, e.g. door handles, tables, instruments and sanitary rooms. IPA SPRIT 70% does not evaporate as quickly as pure alcohol (93%), whereby a longer contact time is achieved. Comes as a liquid for application with a cloth as well as impregnated blue wipes.						
IPA Sprit 70% (Wipes) - Flow packs	48 pcs		Wipes	24	73728	26193
IPA Sprit 70% (Wipes) - Jumbo Canister	150 pcs		Wipes	6	360	12344

NOVACLEAN SPRAY is a basic cleaning agent used for thorough cleaning of extremely dirty and greasy surfaces within the institutional area, the food industry and the auto/transport business. Novaclean Spray has good fat and oil emulsifying properties.						
Novaclean Spray	500 ml		Bottle	12	432	41129
IMO BIO DRAIN contains a culture of natural bacteria and enzyme mixture to open and keep drains clear. Imo Bio Drain reacts with organic residue that builds up on sewer pipes, issolving the residue to help prevent slow-running drains. Most enzymatic drain cleaners are intended for general maintenance to maintain proper flow and are not intended to clear fully logged drain pipes. Advantages of enzymatic drain cleaners include relative safety for use in a wide range of plumbing fixtures and low environmental impact. Imo Bio Drain is surfactant and perfume free. The product makes use of a natural bacterial and enzyme mixture to open and keep drains clear. And unlike sodium hydroxide it is noncaustic and will not facilitate combustion. As any plumber will tell you, a good maintenance regimen is the best way to prevent clogged drains. Flushing drains weekly with boiling water can help keep them clear. Also, installing small screens atop drains will help keep hair, lint and other clogging elements out of the pipeline in the first place.						
Imo Bio Drain	1 L		Bottle	12	360	26151
IMO DRAIN 310 for cleaning of fully or partially blocked drains. Effectively dissolves fat, hair and soap deposits and prevents bad odours.						
Imo Drain 310	1 L		Bottle	12	360	41003
IMO DRAIN 311 is an alkaline, powder product which is very stronly absorbing and mixed with water under large heat generation. This mix of heat water and chemical can boil and give accident, therefore we suggest you to follow security measure from the MSDS. Imo Drain 311 will attack aluminium, tin, lead and zink. Imo Drain 311 dissolves fat and protein. Flush with water.						
Imo Drain 311	1 kg.		Tub	6	450	41801
BEDPAN WASHER is a special cleaning agent for bedpan washers, high pressure hot water cleaning and decontaminators. Is used in bed pan washers with automatic dosing. Bedpan Washer is a liquid special agent with great cleaning effect. Leaves bedpans and wash bassins bright and without lime stains.						
Bedpan washer	5 L		Canister	3	108	41861

FLOOR CARP. 337 is used in carpet cleaning machines for cleaning of loose and fitted carpets. (Control that the carpets are shrink-proof and colorfast before use.) Floor Carp. 337 quickly and effectively loosens dirt and fat from the carpet fibers. In case of difficult dirt, the carpet can be wetted with Floor Carp. 337 before cleaning. Well suited for all carpets.						
Floor Carp. 337	5 L		Canister	3	108	26039
FLOOR POLISH 336 is well suited for daily cleaning of all floor types. Floor Polish 336 is based on polymer wax und leaves a dirt-repelling, silk mat and anti-slip surface. It is recommended that the floors are periodically washed with an Uni Surface 720.						
Floor Polish 336	5 L		Canister	3	108	41660
FLOOR RESIN 338 is especially well suited for removal of resin on sports flooring. Floor Resin 338 can be used both manually and in a floor washer. Floor Resin 338 can be used on all types of floors.						
Floor Resin 338	5 L		Canister	3	108	41046
Floor Resin 338	20 L		Canister	1	36	41089
FOAM ACID 335 is a strongly acidic foam cleaning agent for use in the tobacco and alcohol industry as well as in the food industry. Use on acid-resistant surfaces where a quick and effective cleaning and descaling in for example industrial kitchens, the food industry, shower rooms, public swimming pools and more is required. Foam Acid 335 is well suited for use on vertical surfaces because the foaming cleaning agent makes stable foam with very good adhesion. After 5-15 minutes, the foam is rinsed off with clean water. Do not use Foam Acid 335 on untreated aluminum.						
Foam Acid 335	5 L		Canister	3	108	22148
FOAM ALKA 334 is a strong foam cleaning agent. Use on alkaline resistant surfaces where a quick and effective cleaning is required. For example on tiles, concrete, stainless steel and more. Foam Alka 334 is well suited for use on vertical surfaces as the foaming cleaning agent makes stable foam with very good adhesion. Do not use Foam Alka 334 on untreated aluminum.						
Foam Alka 334	5 L		Canister	3	108	41803
FOAM NEUTRAL 333 is a foam cleaning agent for daily cleaning of shower rooms, wet rooms, industrial kitchens and more. When laid out with foam equipment, Foam Neutral 333 gives an even, pleasant foam layer which effectively removes dirt and fat.						
Foam Neutral 333	5 L		Canister	3	108	41735

## SANITATION / DRAIN CLEANER

Product	Weight	Ecolabel	Packaging	Per colli	Pallet size	Item no
IMO ALKA 710 is alkaline and is used for periodic cleaning of all surfaces which tolerate water. Imo Alka 710 has good fat emulsifying properties. Every third time we recommend to wash floors with a multipurpose cleaner. Imo Alka 710 is also good to periodic cleaning of equipment, walls, painted surfaces and kitchen machines.						
Imo Alka 710	1 L	Yes	Bottle	12	360	24612
Imo Alka 710	5 L	Yes	Canister	3	108	26022
IMO ALKA F 711 is alkaline and is used for periodic cleaning of all surfaces which tolerate water. Imo Alka F 711 has good fat emulsifying properties. Imo Alka F 711 is well suited for periodic cleaning of floors, equipment, walls, painted surfaces and kitchen machines.						
Imo Alka F 711	1 L	Yes	Bottle	12	360	22112
Imo Alka F 711	5 L	Yes	Canister	3	108	22122
IMO ALKA 110 is a low foaming cleaning agent for basic cleaning and degreasing in food production and related industries. The product does not corrode aluminium. Imo Alka 110 has unique fat and oil emulsifying properties and is especially suited for removal of residues of chain wax and cleaning of conveyor belts. Does not contain EDTA and can be used on all surfaces.						
Imo Alka 110	1 L		Bottle	12	360	24624
NOVACLEAN SPRAY is a basic cleaning agent used for thorough cleaning of extremely dirty and greasy surfaces within the institutional area, the food industry and the auto/transport business. Novaclean Spray has good fat and oil emulsifying properties.						
Novaclean Spray	500 ml		Bottle	12	432	41129
IMO BIO DRAIN contains a culture of natural bacteria and enzyme mixture to open and keep drains clear. Imo Bio Drain reacts with organic residue that builds up on sewer pipes, dissolving the residue to help prevent slow-running drains. Most enzymatic drain cleaners are intended for general maintenance to maintain proper flow and are not intended to clear fully logged drain pipes. Advantages of enzymatic drain cleaners include relative safety for use in a wide range of plumbing fixtures and low environmental impact. Imo Bio Drain is surfactant and perfume free. The product makes use of a natural bacterial and enzyme mixture to open and keep drains clear. Flushing drains weekly with boiling water can help keep them clear. Also, installing small screens atop drains will help keep hair, lint and other clogging elements out of the pipeline in the first place.						
Imo Bio Drain	1 L		Bottle	12	360	26151

## DRAIN CLEANER/LIME REMOVER

Product	Weight	Ecolabel	Packaging	Per colli	Pallet size	Item no
IMO DRAIN 310 for cleaning of fully or partially blocked drains. Effectively dissolves fat, hair and soap deposits and prevents bad odours.						
Imo Drain 310	1 L		Bottle	12	360	41003
IMO DRAIN 311 is an effective cleaning agent for clogged drains. Imo Drain 311 is an alkaline and strongly water-absorbing product generating a large amount of heat while mixing with water. The mixture may, hereby, start boiling and may cause accidents. The product is not corrosive to tin, lead and zinc. Imo Drain 311 effectively dissolves fat and protein. Causes lime deposits at hard water, thus requiring a succeeding acid cleaning. Rinse with plenty of water. DO NOT USE ON ALUMINIUM OR OTHER NOT ALKALI-RESISTANT SURFACES.						
Imo Drain 311	1 kg.		CTub	6	450	41801
LIME 370 is used as descaler for coffee machines. Regular use of Lime 370 prevents lime deposits.						
Lime 370	1 L		Bottle	12	360	41340
LIME 371 is used as descaler for coffee machines. Regular use of Lime 371 prevents lime deposits.						
Lime 371	500 ml		Bottle	12	432	41342
Lime 371	5 L		Canister	3	108	41343
LIME 374 is used for descaling of coffee machines, washing machines and dishwashers. Lime 374 effectively removes lime residues. Do not use on untreated aluminum, light metal alloys or on other non acid resisting materials.						
Lime 374	1 L		Bottle	6	378	24631

# SANITATION

## LIME REMOVER

Product	Weight	Ecolabel	Packaging	Per colli	Pallet size	Item no
LIME ACID 170 is a strongly acid lime and corrosion removing cleaning agent for acid-proof surfaces. Lime Acid 170 is suited for institutions, industries, swimming facilities etc. Lime Acid 170 is especially effective against severe lime deposits. Lime Acid 170 is suited for removal of corrosion from e.g. brake blocks, water taps etc.						
Lime Acid 170	1 L		Bottle	12	360	24620
LIME ACID 376 is a strongly acid lime and corrosion removing cleaning agent for acid-proof surfaces. Lime Acid 376 is suited for institutions, industries, swimming facilities etc. Lime Acid 376 is especially effective against severe lime deposits. Lime Acid 376 is suited for removal of corrosion from e.g. brake blocks, water taps etc.

COMBI HEX 85% is used where a thorough, effective and long lasting hand disinfection is required. Do not use in connection with surgery of middle-ear and eardrum. Only to be used in operation rooms. COMBI HEX 85% is an effective disinfectant due to content of ethanol and chlorhexidine, in the product. COMBI HEX 85% contains glycerine which softens the skin, the product is therefore very gentle towards the user.						
Combi Hex 85%	1 L		Dispenso	6	288	41299
DENTIN is a combined cleaning and disinfecting agent used for regular cleaning and disinfection of all washable surfaces. Especially suited for cleaning and disinfection of bathrooms, toilets, kitchens and on all surfaces that will stand water. Dentin effectively removes ordinary types of dirt. Broad-spectrum disinfectant active against most types of bacteria, yeast and mould. Cleans, disinfects, removes smell and prevents rot and calcium formation. If the product is used for disinfection, this must be carried out as a separate process after a preceding cleaning followed by a rinsing. No matter how the product is used – for cleaning or for disinfection – all surfaces which will later get into contact with meat and meat products must be rinsed thoroughly with drinking water. For ordinary cleaning: 0.5-0.7 dl/10 litres of water. For disinfection: 0.8-1.2 dl/10 litres of water. Process time when used as disinfectant: 5 minutes - 1 hour.

KLORRENT is a disinfectant for all chlorine resistant surfaces such as instruments, tools, machines, equipment and the like. Klorrent is also well suited for bleaching of dish and floor cloths. Klorrent is a bleaching agent and disinfectant. The product is used after previous cleaning. For disinfection use 1-2 dl (4-8 pump strokes) for 8 liters of water. After final disinfection, all surfaces that will later be in contact with foods, shall be rinsed thoroughly with drinking water. For bleaching use 1/2 dl (2 pump strokes) for 8 liters of water. DO NOT MIX WITH ACID OR ACID CONTAINING PRODUCTS.						
Klorrent	1 L		Bottle	12	360	41355
Klorrent	5 L		Canister	3	108	41356
DESINFECT MAXI is a liquid, neutral foam disinfectant for the food industry. Desinfect Maxi can be used for disinfection of production rooms, floors and walls, machines and equipment etc. Desinfect Maxi is a broad-spectrum disinfectant which is effective against bacteria, yeast, mould and vira. Desinfect Maxi effectively removes all micro organisms which can damage foodstuffs. Desinfect Maxi creates a moderately stable foam with good adhesive power which is suitable for use on vertical surfaces. Solution for use: 1-5% (weight percentage). Temperature: 10-40°C. Contact time: 5-60 minutes. Apply as foam with low pressure washer. Do not let the foam dry up. After final disinfection, all surfaces that will later be in contact with foods, shall be rinsed thoroughly with drinking water.						
Desinfect Maxi	1 L		Bottle	12	360	41876
Desinfect Maxi	19 kg		Canister	1	36	12436
DESINFEKTION for disinfection of surfaces, instruments, tools and inventory. Desinfektion is active on ordinarily occuring bacteria and fungi. An exception is Pseudomonas, which sometimes is found in forms, that are difficult to kill with aqueous solutions of Desinfektion. Solution for use: 2% (weight percentage). Temperature: 10-40°C. Contact time: 15-30 minutes. After final disinfection, all surfaces that will later be in contact with foods, shall be rinsed thoroughly with drinking water.						
Desinfektion	5 L		Canister	3	108	12337
Desinfektion	20 L		Canister	1	36	12428
DESINFECT QAC is a liquid, neutral foam disinfectant for the food industry. Desinfect QAC can be used for disinfection of all surfaces, floors, walls, machines and equipment etc.						
Desinfect QAC	1 L		Bottle	12	360	26132
Desinfect QAC	20 kg		Canister	1	36	12339

DES FOAM PAA is a broad-spectrum foam disinfectant used within the food industry for disinfection of rooms, tools, furniture and equipment. Apply by means of the disinfection nozzle or the foaming nozzle of the cleaning unit - or by concentrate sprayer. Des Foam PAA effectively and fast kills bacteria and vira. The content of surfactants provides a good moistening of the surfaces to be disinfected. Application by means of disinfection nozzle or concentrate sprayer will provide moderate marker foam with a faint smell. Application by means of foaming equipment will generate heavier foam ensuring a long contact time on tools and surfaces. Solution for use: 1-3 w/w%. Temperature: 5-25°C. Contact time: 10-20 minutes. After final disinfection all surfaces, that later come in contact with foods, shall be rinsed thoroughly with drinking water.						
Des Foam PAA	1 L		Bottle	12	360	26165
DESINFECT O is used for disinfection of equipment, tools and surfaces in the food industry, health sector and agriculture. Desinfect O is an oxidizing disinfectant. The tablet or the powder is dissolved in water and hereby creates a ready-for-use solution where active oxygen shows a documented disinfection effect. The ready-for-use solution is effective to a number of bacteria and also virus. Further documentation is available. Desinfect O is not corrosive when dosed correctly; however, copper and brass can corrode at continuous use. Dissolve 1 tablet (a´6 gram) in 2,5 liters of lukewarm water about 30°C. In health sector 1 tablet (a´6 gram) in 1 liter water. Contact time: 5-30 minutes. Dissolve 1 tablet (a´24 gram) in 10 liters of lukewarm water about 30°C. Contact time: 5-30 minutes.						
Desinfect O	16 tabs		Tabs	16	1.056	12365
KLORTABS are suitable for disinfection of apparatus and equipment in dairies and milk delivering herds as well as udder wiping before milking. Klortabs is an effective disinfectant to be used after cleaning. Klortabs is dosed in the proportion 1 tablet to 10 liters of water (200ppm chlorine in final solution). Process time: 2-5 minutes Temperature: Max. 40°C. The disinfection is carried out after previous cleaning and rinsing with pure water. After final disinfection, all surfaces that will later be in contact with foods, shall be rinsed thoroughly with drinking water.

Product	Weight	Ecolabel	Packaging	Per colli	Pallet size	Item no
NATRIUMHYPOCHLORIT is used as a bleaching agent in laundries and within the textile industry, for the disinfection of swimming baths, in agriculture and within the food industry. Natriumhypochlorit is, furthermore, used as an oxidizing agent within the chemical industry and for treatment of waste water. Long time use may lead to corrosion of metals for example iron, steel, copper, bronze, brass and aluminium. Natriumhypochlorit is an alkaline, all round and quick-acting disinfectant. Natriumhypochlorit has a good effect against microorganisms like: Bacteria, spores, virus and mould. Generates free chlorine when heated or mixed with acid. For disinfection with 200 ppm active chlorine use in a concentration of 0.16% (0.13 dl to 10 litres of water). To obtain an efficient disinfection the water temperature should not exceed 25°C. Natriumhypochlorit is sold in plastic containers and should never be decanted to metal. Contact with acid will liberate poisonous gas.						
Natriumhypochlorit	22 kg		Canister	1	36	31370
Natriumhypochlorit	930 kg		IBC	1	1	31361
DESINFECT ULTRA is a liquid, neutral foam disinfectant for the food industry. Desinfect Ultra can be used for disinfection of production rooms, floors and walls, machines and equipment etc. Desinfect Ultra is a broad-spectrum disinfectant which is effective against bacteria, yeast, mould and vira. Desinfect Ultra effectively removes all micro organisms which can damage foodstuffs. Desinfect Ultra creates a stable foam with good adhesive power which is suitable for use on vertical surfaces.

# ABOUT NOVADAN

Novadan is one of the largest players of cleaning agents in Scandinavia and expanding and growing in international markets. We develop and produce detergents, disinfectants and personal hygiene products. We provide B-t-B cleaning solutions to a wide range of industries.

- Novadan is an international company with production sites in Denmark and Poland.
- Our sales staff cover most of Europe, the Middle East, CIS, Australia and New Zealand
- Novadan is part of the US-owned group: ITW (Illinois Tool Work Inc.).
- Novadan exports to 35 different countries

# OUR PHILOSOPHY

- At Novadan we place great emphasis on sustainability and HSE (Health, Safety and Environment).
- We work with the highest standards in the production environment and HSE.
- Eco-labeled products make up a large part of our product range.
- Our solutions save energy, water and labor costs
- The production at Novadan is certified according to ISO 9001 (product quality) and ISO 14001 (environmental monitoring)

# BUSINESS AREAS

Novadan covers eight different segments in which we are able to offer high quality and effective solutions with regard to cleaning and disinfection.
