AIR CLEANING CYCLE

BAD AIR IS SUCKED AND FILTERED THROUGH THE WATER. THEN THE EXCLUSIVE MOLECULAR SEPARATOR CATCHES AND REJECTS EVEN THE SMALLEST PARTICLES SO THAT THE OUTCOMING AIR IS HEALTHY, CLEAN AND IT SMELLS GOOD.

WHEN STEAM IS NOT ENOUGH...

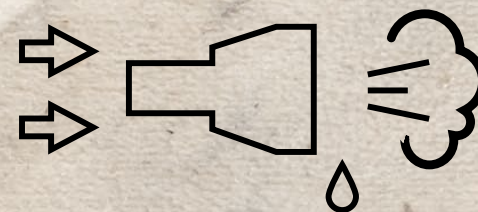

STEAM CLEANING IS MORE AND MORE POPULAR, IT OFFERS MANY ADVANTAGES BUT SOMETIMES IT IS NOT ENOUGH.

POWER JET WORKS OUT

THIS FUNCTION ALLOWS INCREASING THE STEAM POWER AND THE DIRT REMOVAL. A SPECIAL PRESSURE PUMP INJECTS SOME LIQUID TOGETHER WITH STEAM. NORMAL WATER OR, IF NECESSARY, SOME SPECIFIC DILUTED DETERGENT CAN BE USED.
