Introducing the Hygiene Monitor

Our Range of Hygiene Monitors

Standard

If you want a simple monitor that counts down from a pre specified time then the Standard monitor may be for you. Available with a magnet reset or infrared remote*

Standard Plus

The Standard Plus offers all the features of the Standard, plus night and day settings.

Professional

The Professional offers the option to alternate the display between the countdown and the live-time clock.

Professional Plus

This is where it gets really exciting – this monitor offers all the features of the above, plus the ability to record and monitor compliance by cleaning contractors.

Ultima

The Ultima includes all of the compliance features in the Professional Plus and also allows customers to rate the condition in which they have found the facilities.

Ultissimo

The latest edition to the range also features a footfall count so you can find out when your facilities are at their busiest.

Many of our distributors offer lease rental on the monitors thereby making ongoing weekly / monthly revenue.

*Optional extra

Introducing the Hygiene Monitor

Design your monitor

Where possible, we endeavour to create products to customers' specific requirements – you are not buying an 'off the shelf' item, but a unique one. Tell us the shape, size, finished colour, specific text / wording and logos to be used, and we'll do the rest.

The standard colours and shapes used are OVAL and A4, produced in metal powder paint, and finished in white or silver. Face plates can be printed to your specific requirements. We also produce in vacuum-formed plastic, which fits flush against the wall.

Introducing the Hygiene Monitor

Measure Compliance – Data from the Professional Plus, Ultima and Ultissimo

The Professional Plus will tell you when cleaning took place – early/late from the scheduled time. The Ultima also allows you to measure customer satisfaction, while the Ultissimo measures the footfall into your facilities. Below is an example of the data which can be extracted from a monitor.

UNIT 4 data analysis:

Attendance:

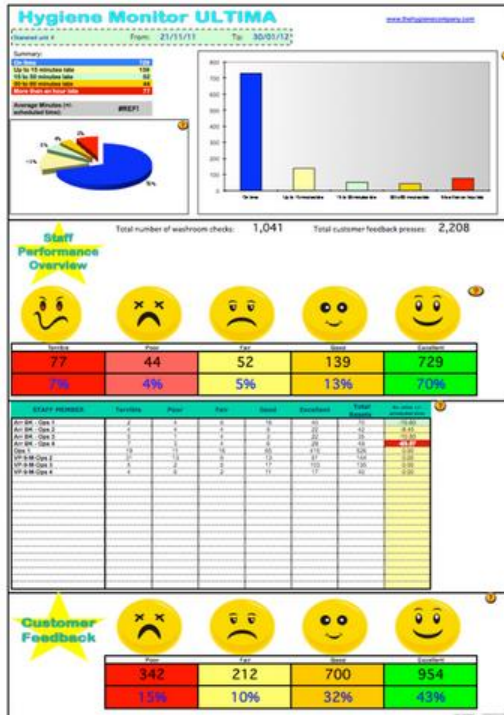

70% of washroom checks were on time

13% were up to 15 minutes late

5% between 15 - 30 minutes late

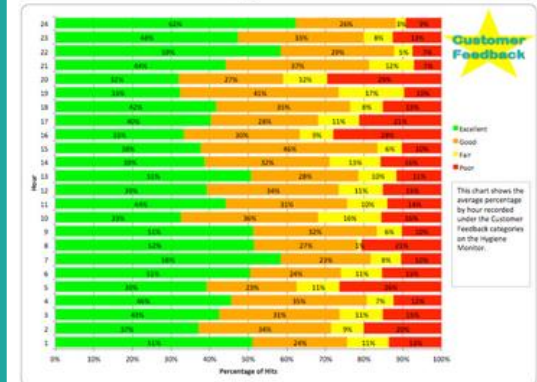

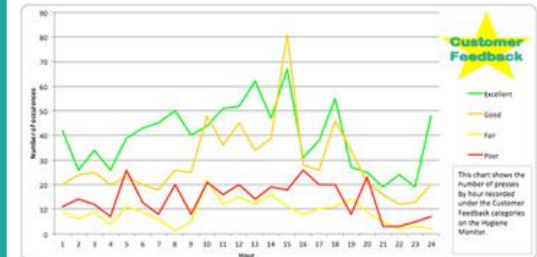

4% between 30 - 60 minutes late

7% more than one hour late

Customer feedback - firstly you will note just how many visitors actually went to the bother of giving feedback, 2,208 with unit 4 alone over a 40 day period = 55 people per day of which

43% found the facilities in excellent condition
 32% found the facilities in good condition
 10% found the facilities in fair condition
 15% found the facilities in poor condition

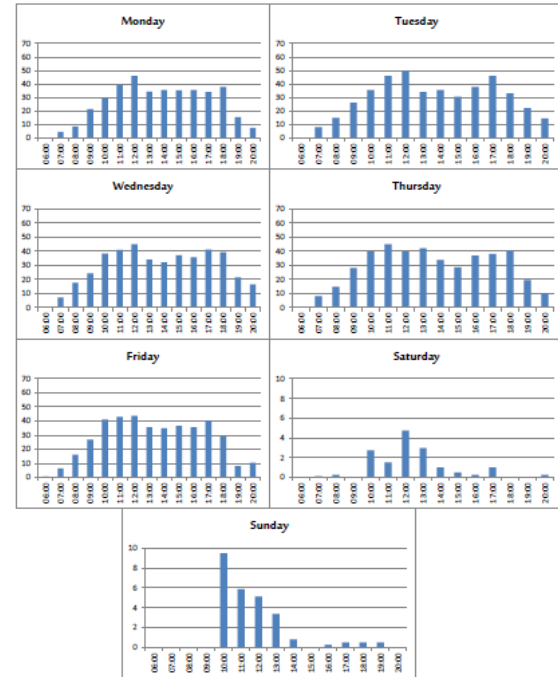

The first chart also allows you to identify those who were prompt and those whom were late to attend to the facilities while the second chart allows you to identify the times at which feedback was given thereby enabling you to identify the time of the day poor feedback is given

Introducing the Hygiene Monitor

Monitor Footfall – with the Ultissimo

Measuring footfall means you can target your busiest periods. The Ultissimo counts the number of people using your facilities and data downloads allow you to present this information in an easy to read format.

The Ultissimo has all the great features of the Ultima with the addition of Footfall. You can also upgrade your Ultima to include footfall data – contact us for more information.
