

THE HYGIENE COMPANY

All new range of

Hygiene Monitors

If your facilities don't measure up, your customers might just look elsewhere!

Five new models, each unit built to your specific requirements.

We offer **all** of the features you could possibly ever require.

- Countdown monitor
- 4 digit LCD display
- Live time clock
- Record and monitor the actions of your cleaning staff.
- Customer feed back buttons
- SMS text technology
- All models upgradeable at anytime

Now you really can throw away
the old pen and paper routine
monitoring

Where possible, we endeavour to produce products to customers specific requirements, which often means the customer is not buying an 'off the shelf' product, but more a case of a product made to their specific requirements.

This means the customer can often specify shape, size, finished colour, text / wording and logos to be used.

Standard colours and shapes we tend to use are OVAL & A4 produced in metal powder paint finished in white or silver.

We also produce in vacuum formed plastic which fits flush against the wall.

Features Include:

Simple Countdown

- Custom 4 Digit LCD Display
- Counts down from up to 19h 99 minutes to zero minutes
- Internal real-time clock 12 / 24 hour clock – AM / PM
- Countdown monitor

Infra-Red Key Fob

The optional extra of the infra-red remote allows remote re-setting of the hygiene monitor. Just press the button on the key-fob and the countdown will be reset.

Smart - Card

Operators can reset the time using a secure smart card – the machine logs the date, time and card number
Operators can “log in”

using a secure smart card the machine logs the date, time and card number.

The manager uses another type of Smart Card to offload the “audit log” which can then be read on a PC, displayed and saved in a data base format.

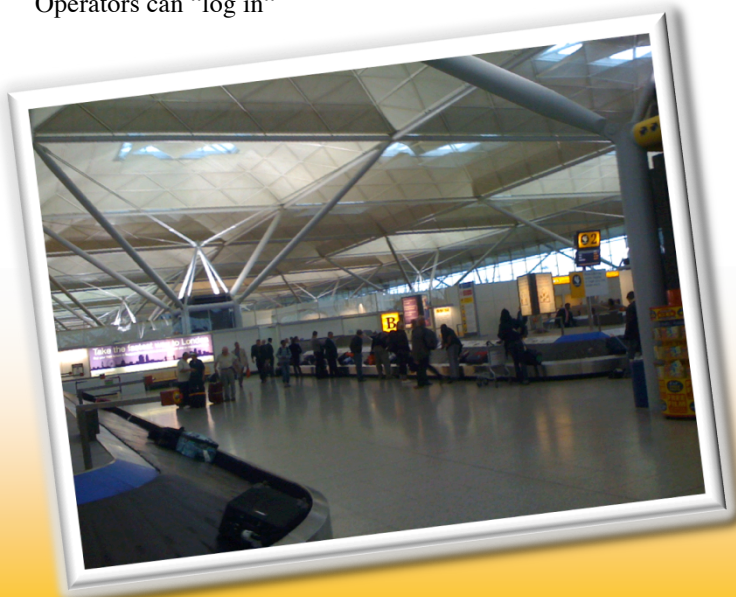

Customer Feedback

Invites your washroom users to rate the condition in which they have found your washrooms.

- 4 buttons: Poor, Fair, Good, Excellent.
- Option to bleep if poor or fair pressed more than say 5 times within a countdown period.
- Data Showing what time buttons were pressed.
- Delay on buttons pressed so that POOR can't be pressed continuously - only last button pressed with say 5 second period shown.

SMS Facility

All of our Hygiene Monitor's have the option of adding the SMS facility, allowing text messages to be sent from the monitor to your mobile providing you updates on the status of the Hygiene Monitor.

Models

Standard

The Standard monitor offers a simple countdown from a predetermined time. On reaching '0' INSPECTION NOW DUE is illuminated.

Maximum countdown 19h 99 minutes, battery low indication warning. Monitor is reset using a magnetic swab, which is supplied with key ring.

Standard plus

The Standard plus offers all the features found on the standard monitor plus both night and day setting.

Allowing you to set for example that between 07.00am – 22.00pm the count down is 60 minutes and between 22.00pm – 07.00am the countdown is 180 minutes - Maximum countdown 19h 99 minutes (TBC) Magnet reset or Infra red remote control.

Professional

The Professional offers all the features found on the standard monitor plus the option to go in to a negative count on reaching zero (maximum negative count -19:59 minutes).

Plus the option to alternate between live time clock and countdown, display date, day, Auto BST/GMT time adjustments – real time clock 12 / 24 hours.

Countdowns settings can be set by day, and time in each day. Example 07.00 – 22.00 60 minute countdown 22.00 – 07.00 180 minute countdown – settings can be specific to certain days - Mon / Tues / Wed / Thurs / Fri / Sat / Sun

Professional Plus

The Professional Plus, the facilities hygiene monitor that monitors and records compliance to procedures.

Its only a matter of time before your customers start asking you about The Professional Plus Hygiene Monitor, which will allow them to replace the scruffy pen and paper routine monitoring system.

Hygiene monitoring at its best - Smart card technology allows you to monitor and record compliance to procedures providing data that cannot be altered or amended in anyway.

Staff are given their own personal smart card (the size of a credit card) which records and monitors each individuals compliance to procedures.

Recording the time, date location, name of the person whom attended to the washrooms, if they were late or early. All data is in turn viewed on your computer.

Ultima

Invites your washroom users to rate the condition in which they have found your washrooms.

The Ultima has all the features of the professional plus as well as:

- Customer feed back buttons:
Poor / Fair / Good / Excellent
- Option to bleep if poor or fair is pressed, for example more than 5 times within a countdown period
- Data Showing what time buttons were pressed.
- Delay on buttons pressed so that POOR can't be pressed continuously - only last button pressed with say 5 second period shown.

Want to know more?

As manufacturers, we aim to ensure we produce to your exact requirements. Our monitors have been built on the continuous input we have received from our customers over the past 8 years.
