

ABOUT BANANA PRODUCTS

What was originally inspired by the popular Nintendo 64 game Mario Kart, founders Patrick and Kevin Brogan invented the Banana Cone; a safety cone molded into the shape of a banana. The iconic banana peel slip dates back to the early 1800's and was used in the worlds first comedy films beginning with Charlie Chapman. The “don't slip” warning message is inherent in the shape of the cone and recognized by billions of people around the world.

Today, the average cost per slip-and-fall accident is \$22,000, totaling around \$70 billion each year. Businesses will reduce the slip-and-fall accidents by promoting safety and using proper equipment. Our solution for slip & fall prevention is not only fun and unique, but has proven to be a more effective safety measure than traditional wet-floor cones and signs. With patents in over 60 countries, Banana Products supplies a full line of products recommended by safety experts for fall prevention.
