Family business
The employees around 1900

Oriented towards values – that's FLORA

Quality, innovation and know-how: Since our business started, in 1875, we have stood by these words. They are our promise to you, our customers, and you can rely on it. We are ready for you. Worldwide. From the heart.

Made in Germany

Made for professionals

We specialise in high-quality tools. In our company we design and manufacture trolleys and tools for maintaining green areas and for outdoor cleaning work. The typical users include towns, communities, garden and landscaping companies, service companies, schools and industry. We supply dealers and distributors in Germany, Europe and many countries around the world.

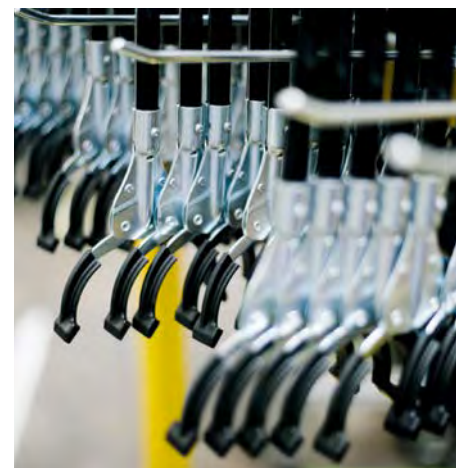

Consistency and development

The founding father of FLORA, Wilhelm Förster, FLORA's founding father, recognised the need as long as about 150 years ago and laid the founda-

tion for the company. He was a blacksmith who produced mainly tools for gardening and field work. But times changed, and so hard work became know-how and skills, and the inventive spirit developed into innovation. For decades, the enthusiasm remained the same, and it's still the same now, for the fourth generation.

Materials with character

Our products are made of steel and aluminium. Materials with character. They represent stability, robustness and durability. They are part of our personal style, and we adhere to them, just as we do to the sustainable use of resources.

The power of technology and production

Our strength comes from our work. We take responsibility for the entire process, from product development to production, assembly and shipping. We design all our products, and we send the data digitally and directly to our modern manufacturing facilities for manufacture. Modular manufacturing concepts make possible a wide range of products, so we are able to offer customer-specific solutions. What does this mean for you? It means flexibility, individuality and speed.

Quality doesn't happen by chance

Our employees are our greatest asset. Old and young – all of us ensure your satisfaction with our passion and by taking the maximum care. Our quality has many roots. It is the result of constant improvements and attention to detail. It is the result of our experience and of your ideas. We look forward to talking to you!

We offer functionality, design and benefit

We focus on our customers' needs. Our aim is to support you, to improve your processes and to increase your efficiency. This is why we never offer you simply a „commodity“. Instead, we offer you functionality, ergonomics and added value. In addition, we constantly ask ourselves how we can make your working day and life easier.

Pure flexibility **Trolleys for outdoor cleaning**

Waste collection is very important! In fact, the work of municipal and private services is essential for environmental protection.

FLORA's trolleys make it easy to transport waste and refuse in public spaces, parks and on difficult terrains.

Picobello, Easy, Carrier

FLORA cleaning trolleys are indispensable helpers for grounds maintenance and waste disposal. Three types for different applications satisfy the highest demands as regards functionality, stability and ergonomics.

The Carrier Original carries a 120 l rubbish container and has all the advantages of the Pico-bello series. Practical rollers as a loading aid, holders for four handle tools and a Greifboy are included.

The Carrier Volumo increases the volume of a wheelbarrow by almost three times. A handle tool holder is available as an option.

The Carrier Pick Up is a lightweight frame which can carry a 240 l refuse bin ergonomically. It holds two handle tools and a Greifboy.

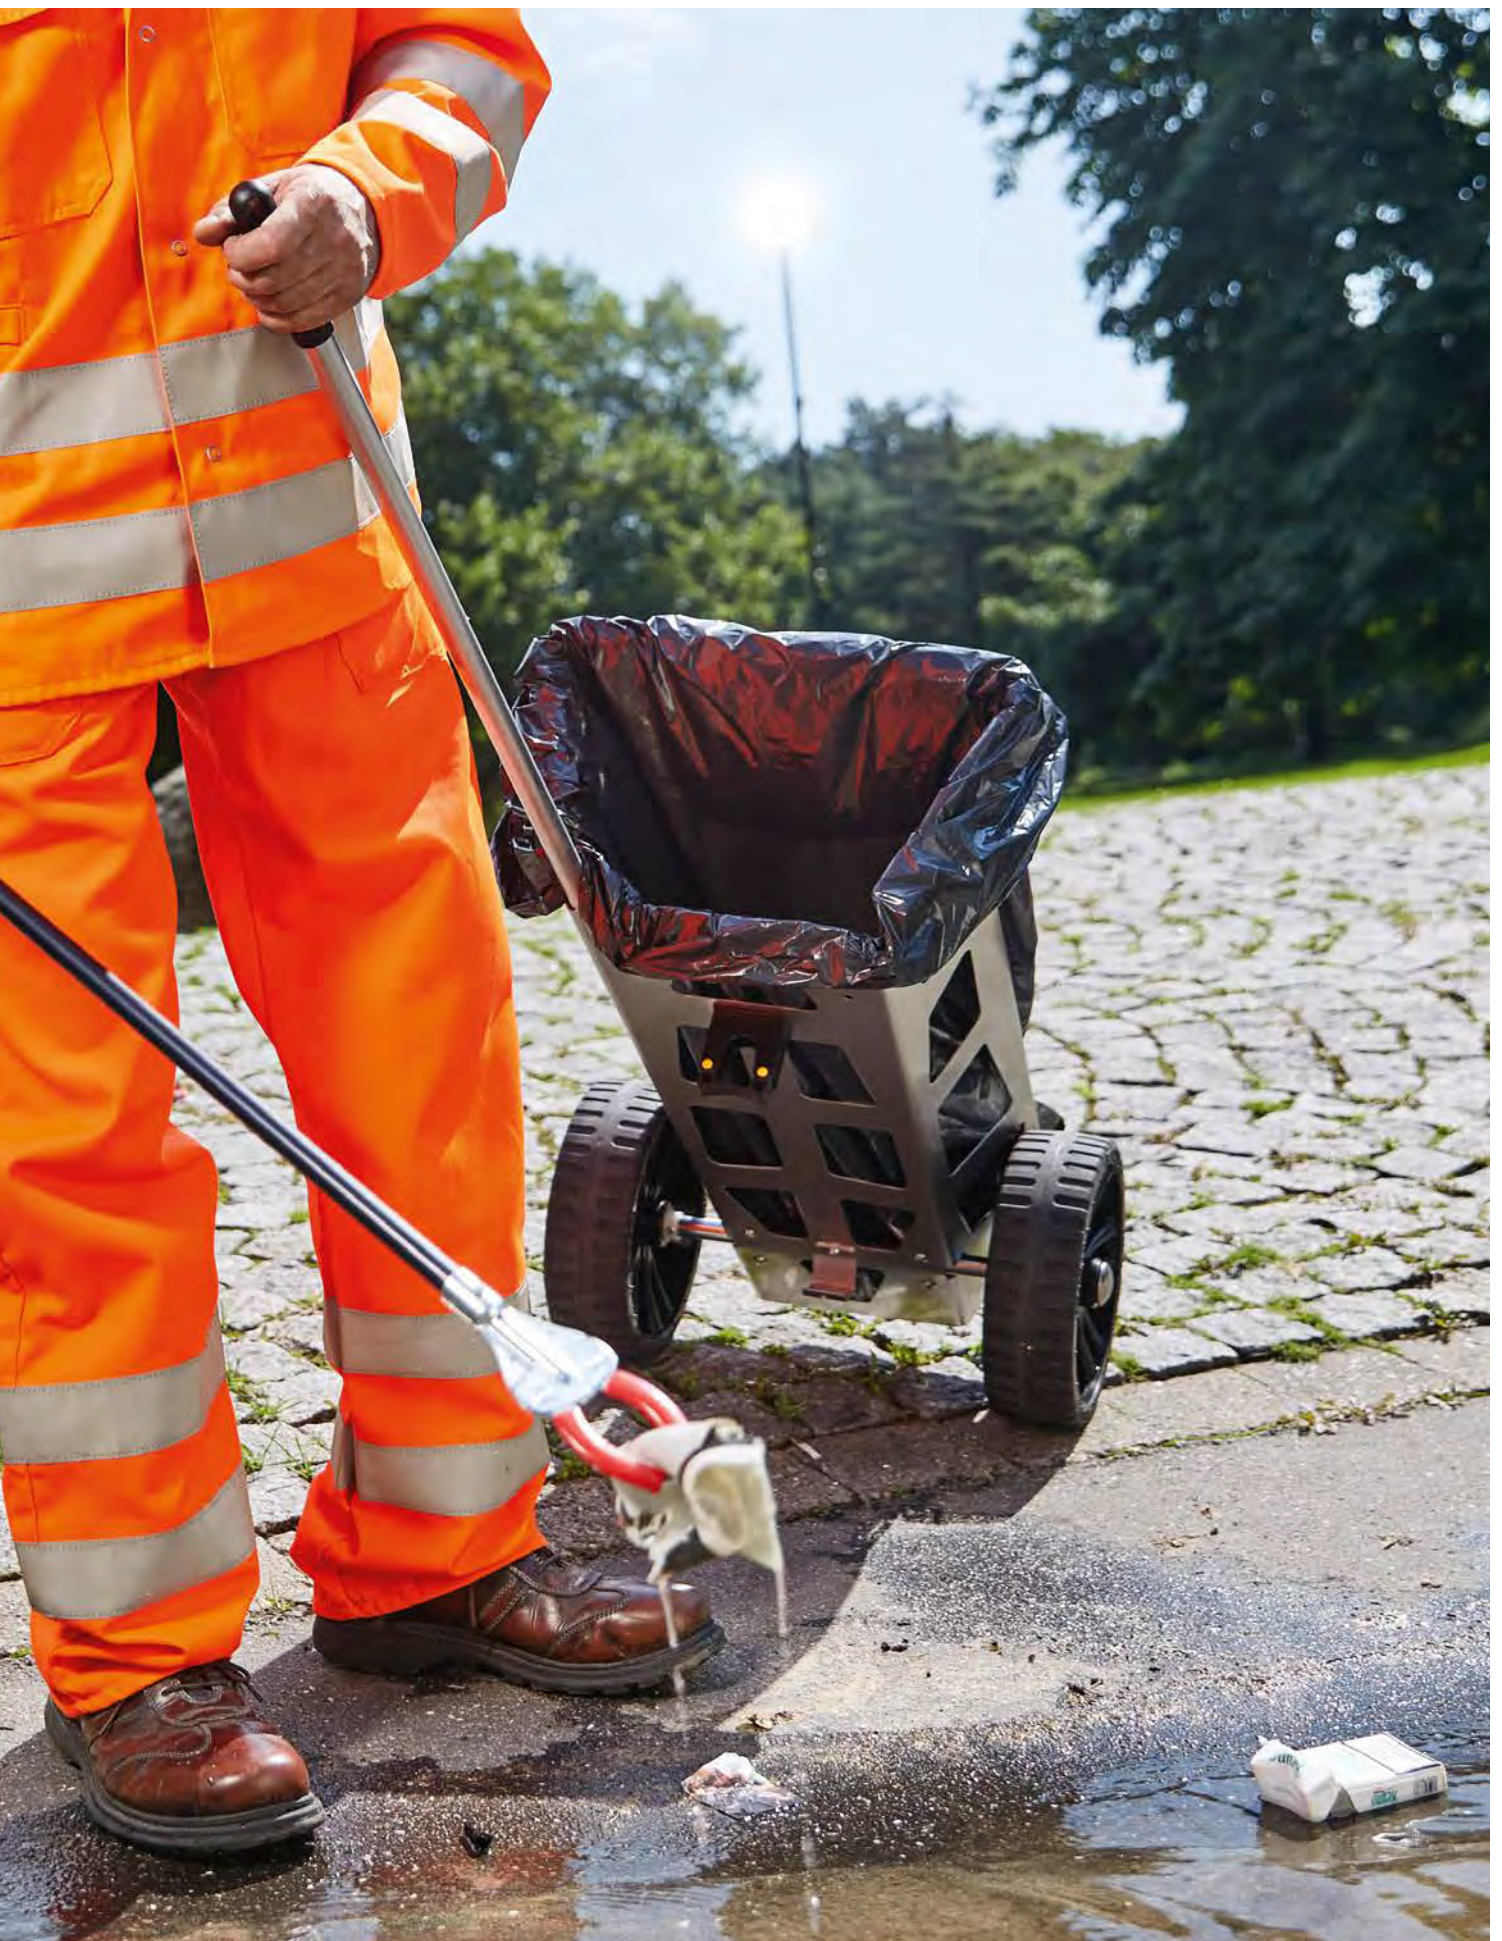

Ready to clean up **Tools for outdoor cleaning**

Our programme is based on careful product development which meets all the demands made of quality, efficiency and durability.

In the waste collection sector, functionality and ergonomic handling of the equipment are of great importance. These are extremely important for every product design.

This is why our litter pickers, dust pans and further accessories combine maximum standards of efficiency and ergonomics. Different versions are available for a wide range of tasks.

Litter pickers

Professional series

Greifboys In the waste collection sector, functionality and ergonomic handling of the equipment are of great importance. These are extremely important for every product design. With so many different types, Greifboys allow fatigue-free work both indoors and outdoors – they pick up a discarded bus ticket just as easily as a large champagne bottle. Based on a maintenance-free, internal mechanical system, they provide maximum durability.

Dustpans and brooms

For a clean sweep – our convenient mobile dustpans replace every rubbish bin. A variety of models and sizes simplify the sweeping routine and ensure sustainably clean surfaces indoors and outdoors. In addition to robust materials, the dustpans convince with intelligent solutions such as a tilting function or different handle lengths.

Made in Germany

The Dusty Special is sturdy and lightweight. A 50 cm wide outdoor broom is available as an option.

The Dusty Special is a mobile dustpan in two sizes for easy indoor and outdoor sweeping.

Wire rake Robust, hard-wearing leaf rake with hard tines for efficient sweeping and light scarifying work. 22 round tines, reinforced bow, powder-coated, PU 10

Number	Width (cm)	Tines
02785	45	22

Leaf rake For routine applications, including home use. 22 flat tines, powder-coated, PU 10

Number	Width (cm)	Tines
02776	45	22

Wide leaf rake Light, thorough working leaf rake for sensitive surfaces, even minimal unevenness. Aluminium carrier, stainless steel rake contour, 590 g, PU 10

Number	Width (cm)	Tines
02703	56	28

Small leaf rake Narrow leaf rake for flower beds, garden beds and hedges. Galvanised steel, PU 10

Number	Width (cm)	Tines
02701	29	11

The wide leaf rake has a spring-loaded tine rail – especially suitable for sensitive surfaces.

FLORA display stands, more details from page 62.

Plastic leaf rakes

Landscaping rake Extra large, light leaf rake for dealing with large areas efficiently. Ideal for raking leaves and hedge cuttings. Tough plastic, socket ø 28 mm, PU 10

Number	Width (cm)	Tines
02780	80	30

Combination tool leaf rake and fork High-quality and stable combination-tool for raking and scooping of leaves and grass cuttings. Polyamide, socket ø 28 mm, PU 10

Number	Width (cm)	Tines
02790	60	26

Garden rake, polyethylene Light, easy-to-handle universal rake, e.g. fresh lawns or gravel surfaces. Polyethylene, threaded socket ø 24 mm, PU 10

Number	Width (cm)	Tines	Handle
02770	44	26	without
02771	44	26	aluminium

Garden rake, polyamide Light-weight, sturdy all-purpose broom for leaves and grass cuttings. Polyamide, socket ø 28 mm, PU 10

Number	Width (cm)	Tines
02783	38	20

Leaf scoop Large, flexible leaf scoop for collecting leaves and grass from lawn areas. Polypropylene, PU 5

Number	Measure W x H (cm)
02791	70 x 60

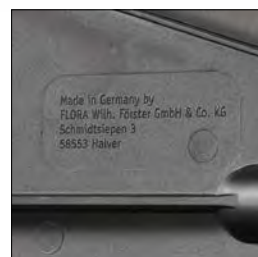

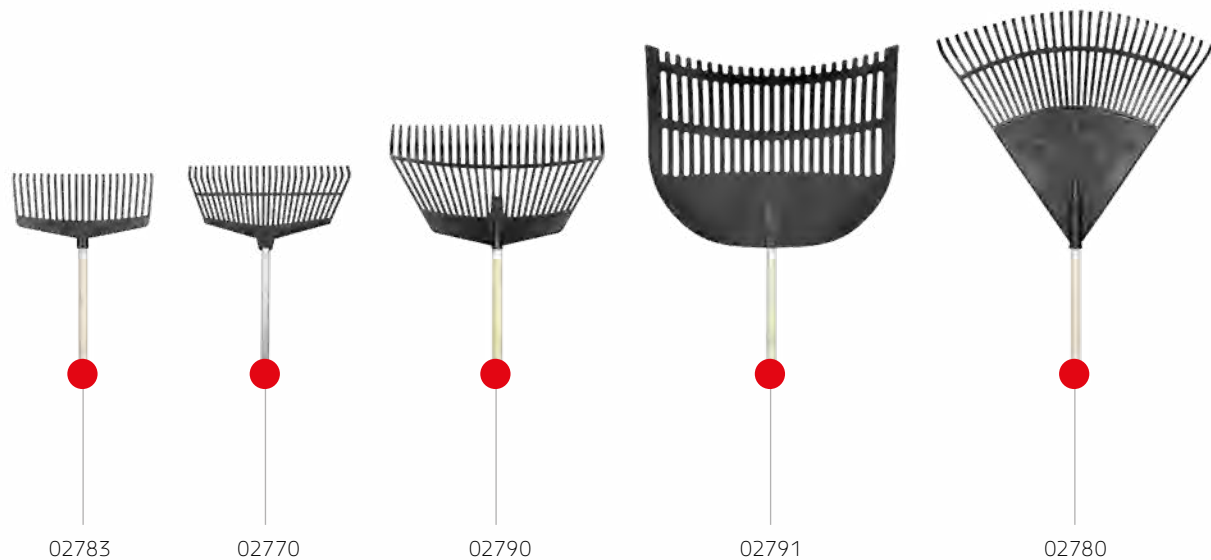

Tool handle Handles for leaf rakes and leaf scoop. Numerous versions, ø 28 mm, PU 10

Number	Length (cm)	Material	Form
02933	140	aspen	straight
02900/140	140	ash	shaped
02900/160	160	ash	shaped

Overview of the sizes

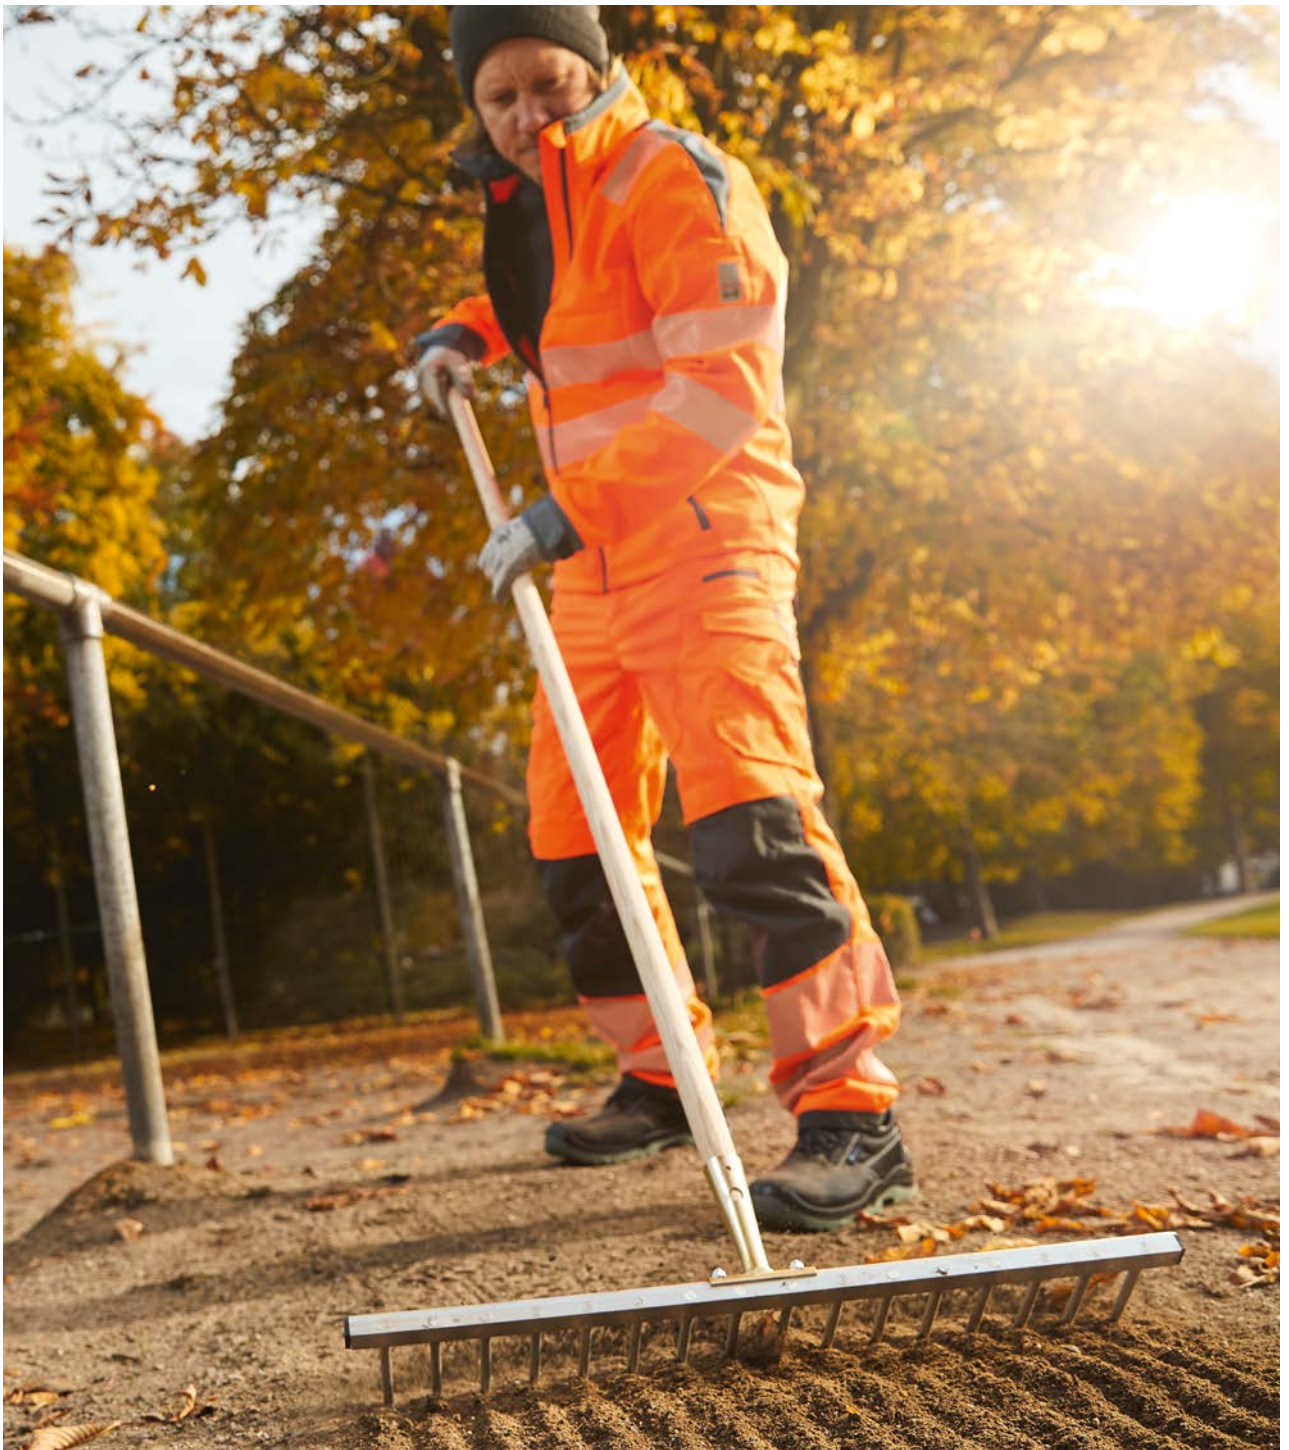

The landscaping rake with its special double sturdy curvature is manufactured in Germany.

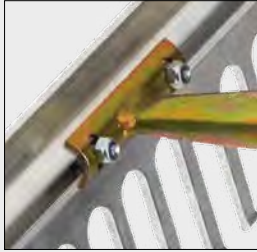

FLORA display stands, more details from page 62.

Rakes

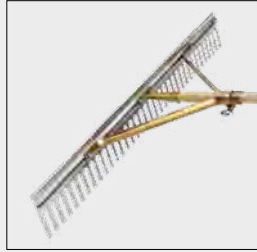

Patented tools for everyday use – our professional rakes made of steel or aluminium are extremely sturdy and light. Its head angle is adjustable and enables the individual alignment of the handle. As in the old days, the Profi garden rake is hardened. The Aluminium rakes have impressed users with its flattening and sowing capability. Another advantage: the rear edge can be used for smoothing. Different versions are available for every use.

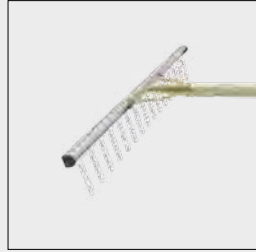

We're happy to assist you. Please contact us
Phone: +49 2353 917-0 Mail: info@flora.biz

All aluminium rakes have an adjustable head angle.

Strong struts stabilise the wide aluminium rake and the pull-off profile.

Hoes, scuffle hoes and scrapers

Irresistible – the Professional hoes succeed easily against weeds and unwanted vegetation on flowerbeds and paths. Their strong steel blade is available in different shapes, replaceable and screwed to a sturdy shaft. Our heavy hoes have forged blades. They are the right tool for clearing and cultivating heavy soils.

We're happy to assist you. Please contact us

Phone: +49 2353 9117-0 Mail: info@flora.biz

Light-weight hoes

FLORA's professional hoes have a hardened blade which is screwed to the sturdy shaft. The blade can be removed and replaced.

Heavy hoes

Our tough hoes have gone through fire! Whether for roots, stones, or stubborn old vegetation - the blades and shaft of the heavy hoes are forged and cope with everything.

Weed remover

The kerbstone cleaner is a special device for communal cleaning. It helps to clean drains, so it prevents dangerous flooding.

Sturdy shaft

Screwed joint

Hardened, replaceable blade

Attractive showrooms and good advice from our retailers – these are the basis for creating a successful bond between the trade and the end customers. We support our resellers with modern sales concepts, including sales walls and productspecific displays. We offer a range of standard modules, taking into account individual requirements and requests, or product choices which are dependent on regional differences.

Sales walls, available in 1, 2 or 3 meters.

The Urbano-concept **Transport systems for electromobility**

Urbano is a transport system unit for vehicles which support the process of landscape maintenance and outdoor cleaning – and it doesn't matter which movement platform an Urbano transport system unit is fitted on.

We're happy to assist you. Please contact us

Phone: +49 2353 9117-0 Mail: info@flora.biz

Cooperations

We work very closely with various manufacturers and provide coordinated solutions for the relevant vehicle types. These solutions range from cargo bikes to street-legal electrical commercial vehicles with an enclosed driver's cab: Garia (page 64), Goupil, M Products, Zallys, Radkutsche (from top left to bottom right).
