

# ABOUT US

## Carpet Cleaner Industries

Carpet Cleaner Industries CCI GmbH means 30 years of experience and production of the **Carpet Cleaner System**. With this system, textile surfaces like all kinds of carpet, upholsteries and mattresses are cleaned ecologically and dry – with lowest moisture.

## Carpet Cleaner System

The world leading carpet manufacturer recommend this unique low moisture Carpet Cleaner System. It consists of high-quality **CRB counter-rotating brush machines** and corresponding **cleanser**. Carpet Cleaner Products are Woosafe certificated. The Carpet Cleaner System is well proven to CRI in USA.

The CRB cleaning machines with the renovator technology are available from 25 cm to 100 cm working width for high area performance up to 100 m<sup>2</sup>/hour.

## Carpet Compound & Encapsulation

The **Carpet Cleaner Compound** is the heart of the system and made by 98% of renewable, organic raw materials. The compound is brushed-in the fibers of the carpet, works by itself according to the system of encapsulation and absorbs the loosened dirt like millions of little sponges.

Then, the dirt-loaded compound can be easily removed with the CRB brushing machine. The carpet can be stepped on immediately. Ideal for the intense deep cleaning and the periodically interim cleaning.

Combined with special **fluid cleaner** and the high-performance cleaner of the **Crystal Family** product range, this system guarantees long-living, long-term clean and well cared carpets.

## Advantages of low moisture carpet cleaning

By contrast with the usual wet cleaning system, the low moisture Carpet Cleaning System works easy on partial areas, too. It does not set up water marks and no sticky residues – you save time and money.

## Upholstery dry foam & Encapsulation

The PS1 dry foam with a special formula has been developed for the cleaning of upholstery, it loosens dirt and odors from textile fibers. During the cleaning process, this dry foam absorbs the loosened soil – Encapsulation. During a short drying time, it crystallizes and can be removed with a towel and/or vacuumed up. The upholsteries can be used immediately. The Master Set for the upholstery specialist and the flexible Power Set contain both equipment and cleanser for a professional cleaning work.

## Mattress Hygiene & Allergy Prevention

Millions of dust mites live in our bed and produce the allergen guanine, which can lead to allergies and indicate health symptoms. An unclean mattress is a hygiene problem and health risk. The worldwide best and chemical-free solution for the mite problem in mattresses is to treat with the dry hygiene technique by Carpet Cleaner, which removes microscopically dirt and mites deep from the mattress fibers.

The **sleep free anti-mite spray** cares for long-term protection effect against dust mites, scientifically proven.

## Distribution

We are European market leader and rank among global leading manufacturers of professional cleaning systems for dry cleaning of textile surfaces. We supply Carpet Cleaner products to importers and distributors in more than 50 countries worldwide. Carpet Cleaner America runs the distribution in USA ([www.carpetcleaner-usa.com](http://www.carpetcleaner-usa.com)). Requests for distribution partnerships are welcome. We are interested in exclusive partners with knowledge of the industries of professional object cleaning in gastronomy, hotel business, public entities, saving banks, shopping malls, chain stores, casinos, theatres, cinemas, cruises, railways and much more. Both the Carpet Cleaner Compound and Crystal Cleaner are certificated for Boeing and Airbus.

For private home there are small sets branded with Clean-it ([www.clean-it.org](http://www.clean-it.org)) and sleep free ([www.sleep-free.com](http://www.sleep-free.com)).

As we are manufacturer, we offer Private Label.
