

EVOLUTION

PERFORMANCE YOU CAN RELY ON

SEBO 300 | 350 | 450 EVOLUTION

Made in Germany

DESIGNED TO WORK

SEBO 300 | 350 | 450 EVOLUTION

The **SEBO EVOLUTION** sets a new standard in professional floor care with product durability, usability and ease of maintenance as the design priorities.

The **SEBO EVOLUTION** offers innovative features that make cleaning easier, while also saving time and running costs. The light handle weight ensures easy control and manoeuvrability – and comfort for prolonged use. The handy wand and integrated suction hose are immediately ready to clean hard-to-reach areas or furniture. Full-size crevice and upholstery nozzles are conveniently stored on the back of the machine.

Intelligent design features, such as an overload-secure foot pedal, quick access to all parts and thoughtfully placed ergonomic handles make the **SEBO EVOLUTION** stand out from the crowd. And, of course, it fulfils the requirements of the European Ecodesign Directive for vacuum cleaners.

Easy Cable Change

Simple and tool-free cable change with integrated strain relief. Saving cost and downtime.

Easy Change Brush Strip

The brush strip can be changed without tools, by simply pressing a button, releasing the side plate and then sliding out the brush strip – economical and convenient.

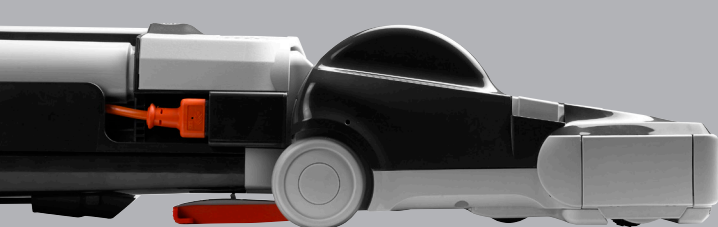

Innovative Brush Height Adjustment

The brush height adjustment button is contoured so that it can be activated using the end of the wand, or by foot. If the brush is obstructed, the machine turns off automatically and an indicator turns red.

Clean Air

The **SEBO EVOLUTION** is equipped with proven, long-lasting filtration that promotes smooth airflow and excellent suction performance. The multi-layer filter bag has a sealing flap for the ultimate in hygienic disposal and the exhaust filter is also available in the HEPA-Class standard.

Low Profile

The **SEBO EVOLUTION** works when flat.

Three Widths

30cm, 36cm and 46cm for small, medium and large areas.
