

PROTECTING HEALTH

DID YOU KNOW ?

Repetitive Strain Injuries (R.S.I.) represent the largest cause of occupational illness in Europe.

74% of workers from the cleaning industry complain of suffering from R.S.I. with about 46% complaining of lower back pains, 23 % of shoulder pain and 22% of elbow, wrist or carpal tunnel pain .

The Concept Microfibre products and in particular the Slooppy System reduce the repetitive movements associated with R.S.I. therefore having a direct impact on reducing occupational illness.

Using an innovative approach to developing the ergonomically advanced Slooppy System and changing the way operators use the cleaning equipment. Concept Microfibre have found a solution to reducing R.S.I. whilst maintaining excellent productivity and cleaning results.

Slooppy

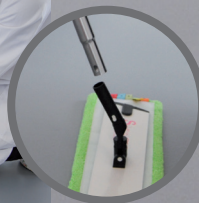

by Concept Microfibre

How to assemble the Slooppy handle and frame ?

1- Put together the handle and frame.

2- Note the direction of attachment.

117 to 178 cm

Anti-slip rotating rubber globe :

- Specially designed to reduce pressure on wrists and improve ergonomics for both dusting and washing processes.

Telescopic handle :

- Can be adapted to the users height
- Handle length from 117cm (closed) to 178cm (fully extended)
- Ultra light aluminium handle : 510g
- Handle diameter 29mm : for better grip and comfort in use.
- **Contoured handle design allows for smooth and natural «S» cleaning movement requiring no rotation of the wrist or arm.**
- Increases productivity up to 50%

Extra flat frame with velcro strips:

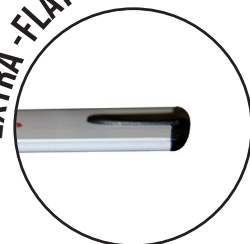

- Ultra light Aluminium head: 270g
- Sturdy and durable
- Dimensions : 8 cm x 40 cm
- Frame easily connects to handle Replacable heavy duty velcro strips
- Innovative rotating connector allowing the «S « cleaning movement
- Ergonomic design : no need to bend down to set or recover the mop pad
- Interchangeable spare parts (connector, end corners)
- Replaceable Velcro strips
