

## BIOLOGICAL TOILET CLEANER

WA 529

Biological product that is formulated with a synergistic blend of selected bacterial strains that are highly active in degrading organic waste and odor control, designed to improve health and hygiene in portable toilets and sewage holding tanks.

### WHERE

#### APPLICATIONS

- Control of odors in bathrooms of mobile residences such as: motorhomes, buses, boats, planes, and trains.
- Portable restrooms at: building and construction sites, mountain cabins, campgrounds, ski resorts, beaches, fairs, markets, festivals, and outdoor concerts.

### HOW

#### HOW TO USE

**Portable toilets:** Add the product directly to the sewage collection tank or through the nearest toilet if access is not possible.

**Bathrooms in RVs** and the like: the product can be added directly to the tank.

### WHEN

#### DOSAGE

**Portable toilets:** approximate dosages from 20 to 100 ml are recommended per 100 L wastewater storage tank capacity.

**Bathrooms in RVs** and the like: dose 25 ml per 15 liters capacity, for waste tank add about 60 ml per 20 liters capacity.

*With active microorganisms*

### BENEFITS

- ✓ **Lower dosages** and faster acting: saves product and time
- ✓ **Effectiveness:** dissolves and disperses dirt facilitating better cleaning
- ✓ **Deodorizing:** prevents odors and leaves a pleasant scent in the air
- ✓ **Safe to use:** the product is not classified as hazardous
- ✓ **Environmental improvement:** eco-design product, minimizes its environmental impact, due to its biological action, it preliminarily breaks down organic matter
- ✓ **Other benefits:** reduces the environmental impact associated with waste spills

**ENVIRONMENTAL INDUSTRY. CAMPGROUNDS. AUTOMOTIVE AND TRANSPORTATION.**
