

HERBAL PURIFIER

DD 4102

Biological product made with specific activity enzymes, organic deodorising agents, and balsamic essences that quickly blocks and neutralizes odours.

APPLICATIONS

- Air freshening of facilities, surfaces, and smelly organic waste.
- Recommended for use in public areas (schools, residences, gyms), offices, institutions, hospitals, healthcare facilities, public buildings (hotels, bars, restaurants) to eliminate odours of organic origin (urine, vomit, decaying food scraps, etc.) in the air and in tanks or containers.

HOW TO USE

Air freshening: Spray directly in the air of the areas you want to treat.
Containers and tanks: Spray directly on the source of odours.

DOSAGE

Ready to use. Doesn't need to be mixed with water.

Long-lasting effect

BENEFITS

- ✓ **High performance**, little is needed to freshen properly
- ✓ **Effectiveness**: works immediately to block odours and freshen the air
- ✓ **Biological action**: highly effective deodorizing action due to its enzymes which increase its ability to block odours
- ✓ **Safe to use**: no hazard handling requirements
- ✓ **Environmental improvement**: eco-design product, minimizes its environmental impact, due to its biological action, it preliminarily breaks down organic matter
- ✓ **Other benefits**: very pleasant aroma and meets sustainability requirements focused on Green Public Procurement

**BARS AND CAFÉS. GYMS. HOTELS.
NURSING HOMES.**
