

CLEANTECH SOLUTIONS

NANO PURIFIER

DD 483

Biological product made with specific activity enzymes, organic deodorising agents, and essences that quickly blocks and neutralizes odours. Uses the new technology of silver nanoparticles that increase its effectiveness, deodorising power, and long-lasting effect.

APPLICATIONS

- Air freshening of facilities, surfaces, and smelly organic waste.
- Recommended for use in community centers (schools, residences, gyms), offices, institutions, hospitals, healthcare facilities, public buildings (hotels, bars, restaurants)
- Rural houses, inns, shops, showrooms, exhibitions, etc.
- Air-conditioning systems, wet areas, areas near sinks, etc.

HOW TO USE

Air freshening: spray directly into the air in the areas to be treated.
Containers and tanks: spray directly on the source of the odour.
Available in 360 System format with microsprayer.

DOSAGE

Ready to use.

Long-lasting effect

BENEFITS

- ✓ **High performance product**, very little is needed to freshen thoroughly
- ✓ **Effectiveness**: contains silver nanoparticles that work instantly to block odours
- ✓ **Biological action**: excellent deodorizer due to its enzymes that increase its effectiveness for blocking odours
- ✓ **Safe to use**: no hazard handling requirements
- ✓ **Environmental improvement**: eco-design product, minimizes its environmental impact, due to its biological action, it preliminarily breaks down organic matter
- ✓ **Other benefits**: very pleasant scent and meets sustainability requirements focused on Green Public Procurement

**BARS AND CAFES. GYMS. HOTELS.
NURSING HOMES.**
