

When hygiene is standard
The secret of maximum hygiene

*The key to optimal hygiene is
achieved by the effective
All Care dispensers. MediQo-line,
when hygiene is standard*

All Care The Netherlands

When hygiene is standard

The secret of maximum hygiene

In healthcare environments and areas where food is prepared, maximal hygiene is a must. It sounds simple, but how do you prevent the spreading of micro-organisms in an environment where people come and go? How do you guarantee that sanitary and other spaces are hygienic? How do you make it easy for employees and guests to keep their hands clean?

Complete line of sanitary accessories

MediQo-line is a complete line of sanitary accessories. From soap dispensers, disinfection units, glove dispensers and waste bins to waste baskets, toilet brush holders, towel dispensers and air fresheners. With MediQo-line you provide sanitary and other areas with easy-to-use products that make maximum hygiene obvious.

Especially for you

All Care designed MediQo-line specifically for environments in which hygiene is a requirement and not an option. The dispensers and accessories are mainly used in hospitals, medical institutions, healthcare centres, restaurants and the food processing industry.

All MediQo-line soap dispensers are supplied with a hygienic wall plate. The plate can be completely sealed on the wall. Therefore no dirt can get behind the plate.

The advantages of MediQo-line

MediQo-line has some striking advantages, allowing this line to fit your diverse needs.

Functionality: In your environment usual dispensers do not suffice. You need specific solutions, such as disinfection units, alcohol dispensers and combo dispensers (one dispenser for two or three hygienic products, such as skin cleaning, disinfection and skin care). MediQo-line meets your specific needs! To prevent the transfer of micro-organisms, we also have the proper non-touch solutions. These dispensers can be operated with the help of levers or sensors and are touchless.

Hygienic: The dispensers help prevent the transfer of micro-organisms. However, the likelihood of these sanitary accessories becoming a source of micro-organisms themselves cannot be ruled out. The MediQo-line dispensers are designed in such a way that they can be cleaned easily and thoroughly. Moreover, they meet the guidelines of the WIP (Workgroup Infection Prevention).

Autoclavable: Many MediQo-line products are suitable for the autoclave, so that you can clean and disinfect them in the same manner you normally do.

Maintenance-friendly: Naturally, the dispensers must be kept clean and tidy. We have, therefore, designed them in such a way, that it is easy to remove them from the wall. Thus it is simple to clean the back; cracks and crevices belong to the past due to the special back plate. Naturally replacing the disposables can also be done in a jiffy.

Representative: The MediQo-line products have a no-nonsense design. Stylish functionality, executed in either aluminium, powder-coated aluminium or brushed stainless steel.

Durable: You probably already use these dispensers extensively. MediQo-line has taken that into consideration. They are extremely durable and resistant to intensive use by professionals and clients alike.

Soap- & disinfectant dispenser

Universal 500 ml dispenser. With refillable plastic reservoir. Suitable for liquid soaps, hand disinfectants and lotions. Available in aluminium, white aluminium and stainless steel. Optional, available with locking plates with window. Operation lever is in 3 lengths available, short, long and extra-long lever. Equipped with stainless steel pump with adjustable dosage. Optional, there are colour clips available to mark the contents.

Many suppliers of cleaning products supply ready-to-use solutions for hand cleaners and hand disinfectants. These disposable reservoirs are easy to use in our MediQo-line dispensers.

Smooth surfaces and neat finish simplify the cleaning and care of these dispensers.

This hygienic soap and disinfectant dispenser is an absolute must! The contents of the dispenser are hygienically dispensed. No soap residues! (Wet soap residue can namely be a breeding ground for growth of micro-organisms, which, even after rinsing off the soap, remain on your hands).

Dispensers should be easy to operate with the elbows, under no circumstance by direct contact. The far end of the pump of the dispenser should also not be touched with the fingers.

Soap- & disinfectant dispenser

Universal 1000 ml dispenser. With refillable plastic reservoir. Easily refillable with liquid soaps, hand disinfectants and lotions. Available in aluminium, white powder coated aluminium and stainless steel. Optional: locking plates with window. Lever in 3 lengths, short, long and extra-long lever. Equipped with stainless steel pump with adjustable dosage. Optional: colour clips to mark the contents.

There are two kinds of dirt:

- Visible dirt: This can thoroughly and carefully be removed by mechanical devices and chemical cleaners.
- Invisible dirt: Micro-organisms, which can only be defused by special disinfectants. The Dutch naturalist Anton van Leeuwenhoek was the first to discover the micro-organisms under the microscope around 1675. He stated: I have more micro-organisms in my mouth than there are people in the Netherlands. And he's right!

For a correct implementation of hygienic hand disinfection, a proper set of dispensers is a must in any workplace! Hands of medical staff are the prime cause of transferring infections.

MQL05K

Plastic automatic soap dispenser

Plastic soap- and disinfectant dispenser white/grey for 500 ml or 1000 ml refillable reservoirs. Suitable for liquid alcohol, alcohol gel, soap or lotion. With drip tray. Supplied exclusive of refillable reservoir and batteries. The disposable plastic pump must be changed every 2 months. Freestanding or for wall mounting.

MQA05K 500 ml version and MQA10K 1000 ml version.

Refillable. For lotion soap and alcohol gel. Battery operated. Suitable for wall mounting. Available in white or stainless steel look.

AC 750W White and AC 750M stainless steel look.

MQA05K

Combination Dispenser

Instead of two or three lockable side-by-side dispensers, it may also be useful to mount a combination dispenser. This type of double or triple detached dispenser saves time when cleaning and filling. Due to the compact design, these dispensers are attractive and have a refillable plastic reservoir. Easily refillable with liquid soaps, hand disinfectants and lotions. Available in stainless steel. Standard locking plate with window. Short lever. Stainless steel pump with adjustable dosage. Optional: colour clips to mark the contents. Also available by request with long lever.

For mounting on rails measuring 10x25 mm. With refillable plastic reservoir. Easily refillable with liquid soaps, hand disinfectants and lotions. Available in aluminium. Long lever. Supplied with stainless steel pump with adjustable dosage. Optional: colour clips to identify the contents.

MQLR05AR Aluminium, 500 ml

MQLR10AR Aluminium, 1000 ml

Mounting Angle

Mounting Angle for mounting the MediQo-line dispenser parallel to the wall. Brushed stainless steel corner wall, suitable for all versions 500 ml and 1000 ml dispensers.

Locking plates and drip trays can also be placed. The mounting wall is an excellent solution for tight spaces in narrow aisles where dispensers with disinfectants should hang, but where there is no place for the usual mounting.

For 500 ml dispensers

MQMH05E-R Dispenser and drip tray mounted on the right

MQMH05E-L Dispenser and drip tray mounted on the left

For 1000 ml dispensers

MQMH10E-R Dispenser and drip tray mounted on the right

MQMH10E-L Dispenser and drip tray mounted on the left

MQLR05AR

MQMH05E-L

MQMH05E AND MQ05A

Holder with drip tray

As drip protection below the disinfected hands. Screws are not required for the MediQo-line dispensers. The drip tray can simply be mounted on the dispenser. The plastic drip tray can be removed when cleaning. Alternatively, there are also drip trays that can be placed directly on the wall under the dispenser.

Disinfectants often stain and discolour the floor. These stains cannot be removed by simple cleaning and look ugly and unsanitary, which cannot be removed by simple cleaning. A drip tray under the dispenser will prevent this from happening.

MQDTH05	Easy mounting to 500 ml dispensers
MQDTH10	Easy mounting to 1000 ml dispensers
MQDTW0510	For wall mounting under 500 or 1000 ml dispensers

Stainless steel towel dispenser for sterile hand towels. Can easily be removed from the wall holder. Autoclavable. To refill, simply open the front cover by means of a stainless steel push button.

MQHSE It is easy to remove the tray. Brushed stainless steel autoclavable

MQHSE

Built-in dispensers

A built-in dispenser is the ideal solution when dispensers cannot be placed due to lack of space or for aesthetic reasons. These high-gloss chromed soap pumps are appropriate for any sanitary area. The reservoir is located under the sink. There are 2 versions available:

- The 1000 ml reservoir is mounted directly under the sink. The reservoir has to be changed under the sink.
- A fixed, mounted suction tube of max. 80 cm and an accompanying bottle holder make it possible to install the bottle or reservoir in an easily accessible place. During use, the tube can be shortened. In addition, the pump in this version can be removed from the top. MQW1 High gloss chrome, 1000 ml reservoir is mounted under dispenser

MQW2 High gloss chrome, 1000 ml reservoir with 80 cm suction tube. To mounted in an easily accessible place

MQW2

Disinfection unit

The portable stainless steel unit is ideal for mounting MediQo-line dispensers. Can be placed anywhere where extra hygiene is necessary.

MQ unit Stainless Steel

MQ unit

Heavy duty dispensers

With plastic reservoir of 2000 or 2500 ml. Universally refillable with liquid soaps and abrasive detergents with high viscosity. Aluminium cover and locking plate with large window. Stainless steel lever, suitable for hand as well as elbow control. Stainless steel pump with adjustable dosage.

In the workplace, workers often get extremely dirty hands, which cannot be cleaned with ordinary soap. They often use paste with abrasive agents. Rather than taking the cleaning paste from a large barrel, prefer using an hygienic dispenser. This dispenser also prevents further waste of the detergent paste.

MQWHD10E

Hand towel dispensers

Suitable for all standard folded paper towels. The dispenser is available in aluminium, white, or stainless steel finish. The dispenser is supplied with a lockable front with window for content checking. The towel dispenser is available in 2 sizes and has a stable back plate with a 3- or 4-point assembling plate. The dispenser can be refilled by opening the front with a key.

Every visitor of public toilets is afraid of infections. Hand hygiene is an efficient precaution. That includes first, clean and well dried hands. This is the only way to prevent bacteria from spreading. Public washrooms generally do not promote proper hand washing, because either there are no hand washing and drying facilities or they do not function properly.

In order to reduce the chance of infection in public restrooms, it is important that sanitary facilities are in perfect hygienic condition. Sufficient toilet paper, well-filled soap dispensers and disposable towels are prerequisites for proper hand hygiene.

For 150-500 towels
