

PROFFESIONAL AIR DUCT CLEANING EQUIPMENT

ROTOBRUSH BRUSHBEAST INTERNATIONAL FEATURES

ROTOBRUSH CONCEPT

Rotobrush is an all-in-one air duct cleaning system combining brush cleaning and vacuum in one unit. It allows you to clean air ducts using one machine only.

4 VACUUM MOTORS

The BrushBeast is the most powerful Rotobrush system yet. With a 90% increase in vacuum power, the BrushBeast can remove even the heaviest build up within air duct systems. Separately from the vacuums the unit is equipped with 450 RPM motor responsible for brush rotation.

FORWARD THINKING DESIGN

The BrushBeast has been designed for ease-of-use. The sloped sides allow for the hose to be easily coiled around the pod to ensure the BrushBeast is easy to maneuver throughout any premises. Its sleek design allows for maximum efficiency while accessing hard to reach spaces.

HOSE AND BRUSH SYSTEM

With 450 rpm's of power, even the heaviest of debris doesn't stand a chance against the BrushBeast. The rotating cable is enclosed within the hose, so it can be used with every type of air duct application, including flexible duct work! The powerful vacuum system quickly collects the debris which are not released back into the air. This combination ensures your customers air ducts are professionally cleaned every time.

TYPICAL APPLICATION

Medical facilities, Office Buildings, Hotels, Petrol Stations, Gyms, Schools / Universities, City halls, Private houses and many more. You can easily clean ventilation ducts measuring from 80x80 to 550x550cm and even larger both rectangular and round.

PROFFESIONAL AIR DUCT CLEANING EQUIPMENT

aiR+ XPi INTERNATIONAL FEATURES

POWERFUL VACUUM SYSTEM

The International aiR+ XP is more powerful than the original aiR+. With up to 50% more power this makes it easier to remove even heavy build up seen in many air duct systems. The aiR+ XP uses two 1/2HP vacuum motors.

HOSE AND BRUSH SYSTEM

The brush system rotates at 450 rpm to loosen the debris from inside walls of the air ducts. As it is loosened, the debris is then vacuumed up in the nozzle located behind the head of the brush. Because the rotating cable is enclosed within the hose, it is safe to use in every type of duct application including flexible duct. work.

HEAVY DUTY BODY

The aiR+ carrier and removable pod are constructed of thick, high quality polypropylene. Both are constructed for superior strength with a textured finish for greater durability.

ADJUSTABLE HANDLE

This handle allows the Rotobrush to be easily maneuvered into tight spaces. When the job is done, the handle collapses down so that the machine fits into your vehicle with ease.

LARGE DIAMETER REAR WHEELS

These heavy duty, semi-pneumatic Rotobrush wheels make rough surfaces, front porch steps and stairways easy to navigate. The large 12" diameter tires with solid steel wheels provide strength and traction on slick surfaces without scuffing up floors.

LOCKABLE CASTERS

Negotiating narrow hallways and rooms filled with furniture is no problem with these 4" industrial casters. They allow the Rotobrush to turn 360° on its center axis. Locks keep the base stationary while in use or being transported in your vehicle

aiR+ XPi SPECIFICATIONS

Pod weight	23,00kg
Pod w/h	34,29 x 58,42 cm
Carrier weight	18,14kg
Carrier w/h	57,15 x 69,85cm
Pod & carrier with handle	57,15 x 76,20 cm (without handle)
Brush Motor	450 RPM: 110-230V
DUAL HEPA filters	99,97% down to 0.3 microns
Power requirements	2,9kW main power

ROTOBRUSH KNOW HOW

- Both Rotobrush aiR+ XPi and BrushBeast systems combine mechanical brush cleaning and vacuum in one unit. You are able to provide air duct cleaning services using only one machine.
- Rotobrush aiR+ XP uses two vacuum motors vs. BrushBeast four vacuum motors.
- Using Rotobrush you can easily clean air ducts measuring from 80x80 to 550x550cm both rectangular and round. It's possible to clean even larger ductwork when revision openings are made more frequently (every 5-7 meters).
- You can clean vertical and horizontal ducts.
- Standard work range is 10,7 meters or 16 meters when using the complete hose extension. This allows you to clean app. 20-30 meters from one revision opening.
- Rotobrush POD is not integrated with the carrier. You can easily take off the POD to get into places where your space is limited. (attics, crawl spaces etc.).
- Using the elastic cable extension you can clean ductwork with 90 degrees corners. With 3,2cm hose assembly + cable extension you can go through up to 3 turns.
- Rotobrush is inexpensive to maintain – just remember to regularly clean hepa filters with air compressor and the machine will operate with no problems. The only consumables are pre filter bags which come in low-cost price.
- Rotobrush is designed to clean dust like contamination typically found in ventilation systems of public buildings. It's not ment for kitchen ventilation or large industrial systems.
