

Sprimsol

Technology and Innovation Applied to the Cleaning Industry

Sprimsol

Sprimsol S.L. began its activity **in 1996** in Spain, in the region of Cádiz. Our main activity is the **manufacture and commercialization of robotic wringers** for cleaning, which automate the function of wringing mops, cloths ..., for domestic and professional application.

Using **technology** to optimize daily cleaning tasks, in companies and homes.

Innovative, high-quality products to help us to save time, also avoiding unnecessary efforts and sick leave.

Our management system is based on the ISO regulations, in order to continuously improve the manufacturing processes and the commercial activity of the company.

Our products

FREGOLA – Automatic Wringer for Domestic Use

Solutions
To make
your life easier

ENAC
Entidad Nacional de Acreditación
EN 50082-1
EN 55022

Fregola characteristics:

- **Drains the mop automatically. Avoid and prevent injuries.** In addition, it is especially indicated for people with physical limitations or muscle / bone problems.
- **Rechargeable battery with great autonomy.** It has no cables, which provides greater security (for use with water) and maneuverability.
- **Easy to transport** thanks to the **wheels** included in the bucket.
- **Up to 60 kgs of wringing pressure.** With a slight inclination of the handle that offer to the mop more wrung out than if we do it manually.
- **Profitable.** Fregola is a wringer that takes care of health for users and brings well-being to them by speeding up cleaning. The sick leave represents a cost of 57% * of the worker's salary to the company.
- **Domestic and professional use.**

* Percentage calculated: average cost of social security 32% + comp. disease 25%.

FREGOLA – Automatic Wringer for Domestic Use

FREGOMATIC – Automatic wringer for industrial use

Fregomatic characteristics:

- **Reduces sick leave and absenteeism. Improves work performance** (more than 15%).
- **Easy to use.** just by inserting the mop, it comes out upwards, leaving the mop cleaner and completely drained.
- **Adaptable** to most of the buckets that are used in the cleaning industry.
- **Low maintenance.** Only paying special attention to recharge the battery when needed.
- **Helps to integrate people with special needs** and revalues the cleaning profession.
- **Improves and speeds up cleaning.** Wrings better and floors become dry quicker.

FREGOMATIC – Automatic wringer for industrial use

Benefits of using our automatic wringers

- Decrease in sick leave.
- Performance improvement.
- Avoid injuries, such as those caused by carpal tunnel syndrome.
- Optimal wringing, with just one operation, it removes more water than with traditional wringing.
- Improves work quality of workers with difficulties to perform repetitive movements.
