WE CONTROL DUST GLOBALLY!

Stadsing A/S is a Danish company founded in 1956 with years of experience in dealing with professional customers within the cleaning industry. The company was originally named Olf Stadsing which is the name of its founder. At present, Stadsing A/S is run by his two sons.

We are a well-known company both in Denmark and abroad for trade, producing and stock-keeping of cleaning detergents, cleaning articles and cleaning machines.

We export to more than 25 countries globally and would gladly welcome you among our customers. Our primary ambition is to offer you the best cleaning solutions based on our quality products, Danish design and competitive prices.

Advantages of doing business with Stadsing A/S:

• Professional customer support and guidance

• High-quality cleaning articles

• Wide range of mop systems for professional cleaning

• Cutting edge company within e.g. microfiber cloths

• Together we reach the optimum cleaning solution!

• Competitive prices

• Training of employees

• Professional help for marketing activities

For more information, please visit our website:

www.stadsing.com

On our website you can download product brochures, catch up on the latest news within the cleaning industry and achieve a deeper insight into the background of our company.

We look forward to doing business with you!

Best regards

Henrik Stadsing
Export Director

GREEN-TEX® MICROFIBER CLOTHS - LONG AND LASTING QUALITY!
Use our Green-Tex® microfiber cloths dry or damp. They absorb dirt, dust and moisture. For hygienic reasons, we recommend using a specific colour microfiber cloth for specific cleaning tasks.

Prevent Cross-Contamination - Distinct colour coding makes it easy to separate cleaning tools into well-defined areas and tasks. Now restroom tools remain in the restroom and kitchen tools in the kitchen. This reduces bacteria and virus cross-contamination between high and low-risk areas. The proper use of the colour-coding system creates a healthy, sanitary building that benefits employees, occupants and visitors.

RUBBER CAPS - FOR COLOUR-CODING HANDLES

Tool holder, red	5050	Plastic	
Grey bag for 8472	8473	Nylon	
Sack holder double for 8449	8472	Steel	

☐ WHAT IS MICROFIBER ?

A microfiber is so called when it's weight is less than 1 gram per 10km length.
For most microfibers this equates to a diameter of less than 0.13 denier.
A microfiber is always made up of two polymers, which combine to form a single tread.
The polymers are used 70% polyester and 30% polyamide(nylon).

Human Hair   MICROFIBER

• The thickness of microfiber is finer than 1/100 of human-hair.

☐ MECHANISM OF CLEANING

- Microfiber would have more than 10 times of surface area comparing to normal fibre, and this will create much stronger absorbability due to capillary actions of these fine holes.

- The ultra fineness of each fibre means more fibers per square centimeter. This results in a far greater quantity of fibers coming into contact with the surface to be cleaned. This gives a faster, more efficient result.

A WIDE RANGE OF ECOLABELLED CLEANING PRODUCTS

The Nordic Ecolabel is the official Ecolabel of the Nordic countries and was established in 1989.
The purpose of the Ecolabel is to contribute to a sustainable consumption. Important environmental issues that are considered in the development of the Nordic criteria are:

- Energy usage
- Climate aspects
- Water usage
- Source of raw materials
- Use of chemicals
- Hazardous effluents
- Packaging
- Waste

WHY CHOOSE AN ECOLABELLED PRODUCT?

- The product has a documented cleaning effect
- The product has fulfilled stringent enviromental and climate criteria
- The ingredients are biodegradable
- Allergenic fragrances must be declared
- The packaging is recyclable and waste is minimized

WE HAVE MORE THAN 50 PRODUCTS THAT CARRY THE NORDIC ECOLABEL AND THE PRODUCTS ARE AVAILABLE BOTH WITH OR WITHOUT PERFUME.
