3M™ Stone Floor Protection System

# Create durable, low-maintenance shine. That's brilliant!

Day after day, your floors take a beating. Give them new life and long-lasting shine with next generation 3M™ Stone Floor Protection. Add brilliant shine and a tough layer of protection that requires very little maintenance, helping you save time and money.

# Next generation 3M™ Stone Floor Protection System.

Now there's an easier solution to restore, protect and maintain the beauty of your marble, terrazzo, polished concrete and other porous stone floors.

Refinish floor surfaces in fewer steps, creating a long-lasting, high-traction shine that resists scuffs, stains and scratches. You can have durable floors that require less stripping and scrubbing – reducing chemical use. It all adds up to reduced labor and maintenance costs.

## Calculate the savings

Over the life of your floors, less labor and more durability add up to increased ROI. To compare the costs of acrylic finishes with those of the 3M™ Stone Floor Protection System, use our savings calculator at [3M.com/stonefloor](http://3M.com/stonefloor).

With 3M™ Trizact™ Abrasive Pads that last 2x longer and the elimination of a burnishing step in the process, the next generation 3M™ Stone Floor Protection System will help you save even more.
