PROFILE

SINCE

1972

PIONEERS IN VACUUM CLEANING

SINCE 1972

WE ARE LEADERS IN THE
INDUSTRIAL VACUUM
INDUSTRY WITH MORE THAN
120 PRODUCTS IN ITS RANGE
AND SEVERAL CERTIFICATIONS
FOR EU AND US COUNTRIES.

Through the ambition and the
commitment to excellence of our
segment, we are producers, we are
pioneers, and we want to
leave our mark on history, pushing
boundaries every day with
Depureco's sales technicians whom
are trained to meet any
requirement of all industrial fields.
Our personnel will always
recommend the best solution.

PRODUCT FAMILIES

120
VACUUM CLEANERS
IN OUR RANGE
MORE THAN 300

SINGLE PHASE

DEPURECO'S RANGE OF SINGLE-PHASE INDUSTRIAL VACUUMS IS DESIGNED FOR ANY VACUUMING REQUIREMENTS OF DIFFERENT MATERIALS, SOLIDS AND LIQUIDS, SHAVINGS OR DUST.

The range is extensive and starts with portable, compact and powerful industrial vacuums with a large filtering surface, finishing with industrial vacuums with 3 large suction motors, with large surface filters and containers that can hold up to 100 L. All vacuums are supplied with M class filter (1 micron filtration capacity) and can be fitted with an absolute HEPA H14 filter.

THREE PHASE

THREE-PHASE VACUUMS ARE USEFUL FOR APPLICATIONS WHERE CONTINUOUS USE IS SOMETIMES REQUIRED OR WHERE THE WORKING CONDITIONS ARE HEAVIER AND MORE DEMANDING.

Vacuums offers the most complete range on the market, with models and specific features for every need. They can be vertical with side channel blower at the top, or horizontal with side channel blower at the bottom inside the rear casing.

HEAVY THREE PHASE

THE RANGE OF THREE-PHASE INDUSTRIAL VACUUMS WITH MEDIUM-LARGE POWER OUTPUT INCLUDES SEVERAL DOZEN MODELS FROM 7.5 KW (10 HP) TO 25 KW (35 HP).

The range is designed to work in demanding applications where there is a lot of material or a lot of pipes, or otherwise difficult operating conditions. These machines can be used for centralized vacuum systems, to pneumatically transport large amounts of material, also through the use of trolley-mounted, tilting hoppers and separators. All of the vacuums in this family have M class filters as standard (filtration efficiency up to 1 micron) and vacuum breaker safety valve installed.

CENTRALIZED VACUUM SYSTEMS

DEPURECO INDUSTRIAL VACUUMS CURRENTLY HAS THE MOST COMPLETE RANGE OF SOLUTIONS FOR CENTRALIZED VACUUM SYSTEMS ON THE MARKET.

Thanks to more than 50 years of experience in vacuum systems, Depureco is able to provide a turnkey system, customising it exactly to specific customer requirements. The range is divided into different types of vacuum and filter units. There are trolley-mounted, fixed, compact solutions mounted on a steel frame for direct discharge into a Big-Bag or into a dust bin, or stand alone solutions with vacuum unit inside soundproof boxes and filter unit with different features based on the specific application.

OIL & SWARF

DEPURECO INDUSTRIAL VACUUMS OFFERS THE WIDEST RANGE OF OIL, EMULSION AND SWARF VACUUMS ON THE INTERNATIONAL MARKET.

The range includes compact solutions 100 Lt capacity and bigger solutions 1000Lt capacity. All units are provided with a system to separate swarf and lubricants permitting to clean CNC tanks very easily and quickly. A submersible pump can be installed on many of the vacuums to recycle the oil directly in the CNC machine after having filtered it with the industrial vacuum. There are also specific systems in the range for the safe extraction and filtration of oil vapours that are generated inside metal working machines.

VACUUM CLEANERS
IN OUR RANGE
MORE THAN 300

ATEX INDUSTRIAL VACUUMS

DEPURECO HAS THE MOST COMPLETE RANGE ON THE MARKET OF ATEX CERTIFIED VACUUMS FOR VARIOUS ZONES RECOGNISED BY THE LEGISLATION.

The range includes compact and portable ATEX vacuums to more complex centralized vacuum systems. There are Brushless industrial vacuums in the ATEX range with ATEX certified side channel blower and Venturi ejectors. They are widely used in the food, manufacturing, pharmaceutical, 3D printing and 3D sintering industries, in composite materials, chemical powders and in the cosmetic sector.

FOOD PHARMA & OEM

DEPURECO PROVIDES A HUGE RANGE OF INDUSTRIAL VACUUMS FOR THE FOOD AND PHARMACEUTICAL INDUSTRIES AND FOR DIRECT VACUUMING APPLICATIONS ON AUTOMATIC PROCESSING MACHINES.

Each industrial vacuum is fitted with M class high efficiency filter systems that can be implemented with H14 filters when necessary. Furthermore, different types of manual and automatic filter cleaning systems are also provided, with shaking, backwashing of the cartridges and with Depureco's Jetclean system.

WELDING FUMES COLLECTOR

DEPURECO PROVIDES A BROAD RANGE OF SOLUTIONS TO COLLECT WELDING FUMES RESPECTING THE HIGHEST SAFETY STANDARDS.

In this range it is possible to find solutions for torch extraction, with mobile units and dedicated fixed plants or mobile fumes collectors, included with a flexible arm to keep the welder safe in any circumstance.

COMPACT INDUSTRIAL FANS

DEPURECO HAS A FULL RANGE OF HIGH AIR FLOW INDUSTRIAL EXTRACTORS, EQUIPPED WITH THREE-PHASE ELECTRIC FAN, ALSO AVAILABLE IN THE ATEX VERSION.

They are usually connected to an articulated extraction arm or to industrial extractor hoods. Depureco compact industrial fans are ideal for extracting airborne dust, welding fumes and light shavings. The range also contains draft tables and specific solutions for direct extraction through the welding torch.

COM-PRESSED AIR

DEPURECO INDUSTRIAL VACUUMS OFFERS A WIDE RANGE OF COMPRESSED AIR INDUSTRIAL VACUUMS, BOTH STANDARD ONES AND ATEX CERTIFIED ONES FOR GAS AND DUST.

By using the Venturi principle with one or more ejectors, Depureco is able to provide excellent suction performance using compressed air. Using compressed air vacuum cleaners, all of the mechanical moving parts, which are normally used to generate the vacuum, are eliminated. Furthermore, Depureco allows you to adjust the Venturi ejector in relation to how the vacuum is to be used.

DEPURECO IS CLEANLINESS

OUR M CLASS FILTERS ARE INCLUDED WITH ALL OF OUR VACUUM CLEANERS. **YOUR HEALTH IS OUR PRIORITY**

We only provide high-quality filters, which can reach up to 340.000 cm2 surface area and 1µ filtration efficiency.

We care about the quality of the production processes and we always want to improve.

WE WORK TO SOLVE PROBLEMS WHILE CONTINUOUSLY TRYING TO IMPROVE

OUR FILTERS' FILTRATION SURFACE AREA IS SUPERIOR TO THAT OF MOST FILTERS ON THE MARKET.

FILTER CLEANING
SYSTEMS

We only provide H14 class HEPA filters:
the higher-classified filter on the market.

H14 HEPA FILTER

A BROAD RANGE OF
VACUUM CLEANERS
DESIGNED TO WORK IN
EXPLOSIVE ENVIRONMENTS

We choose among the best
materials and components on
the market to provide the safest
sturdiest and best performing
vacuum cleaners, suitable to
work in ATEX areas.

SAFETY IS ESSENTIAL

OVER
30 MODELS
IN OUR **ATEX**
RANGE

FULLY CUSTOMIZABLE

SAFETY IS NOT AN OPTIONAL

All the following features are **included
in the price** and available for all of our
ATEX vacuum cleaners:

- **SIDE CHANNEL BLOWERS
MADE IN ITALY OR MADE IN
GERMANY CERTIFIED BY
THE MANUFACTURER**
- **SAFETY VALVE INCLUDED**
- **PHASE CONTROL
RELAY INCLUDED**
- **AISI 304 STAINLESS
STEEL BINS INCLUDED**

Our vacuum cleaners are
entirely made out of metal parts.
This makes them
sturdy, durable and **safe**.

QUALITY=SAFETY

THE PRODUCTION AND COATING OF OUR VACUUM CLEANERS ARE ENTIRELY INTERNAL PROCESSES

We test each one of the vacuum cleaners we make to ensure they will provide the best performance possible

HIGH QUALITY

HIGH PERFORMANCE

IN LOVE
WITH
QUALITY

- 1 **HIGH QUALITY SIDE CHANNEL BLOWER**
Made in Italy or Made in Germany 
- 2 **SAFETY VALVE INCLUDED**
To prevent motor obstruction 
- 3 **FULL METAL MADE**
To guarantee the best resistance on any heavy-duty job 
- 4 **HIGH QUALITY FILTERS ONLY**
Built with the best materials on the market using the best assembly methods 

3 YEARS
WARRANTY

DEPURECO IS THE ONLY VACUUM CLEANER MANUFACTURER WHO PROVIDES A WARRANTY UNTIL THREE YEARS ON ALL OF ITS PRODUCTS

HEALTH

DEPURECO HAS
FULL RESPECT FOR
INTERNATIONAL
STANDARDS RELATING
TO OCCUPATIONAL
HEALTH, SAFETY AND
THE ENVIRONMENT

The numerous certifications
that we have obtained, even
in very specific sectors, are
certificates of excellence.

IS PARAMOUNT

#EVERYBREATHCOUNT

SOCIAL RESPON- SIBILITY

We create more
value for our
customers, for the
communities in which
we operate and for
our company **while
reducing our
environmental
footprint.**

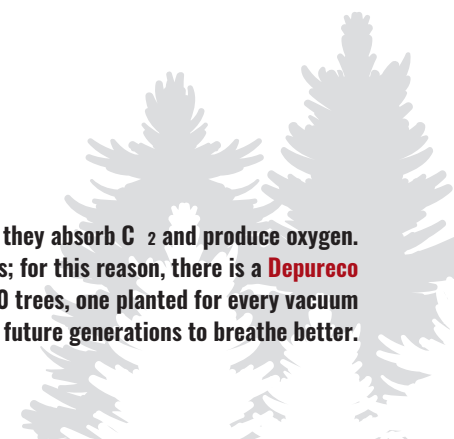

One of our goals is
**raising awareness of
respiratory diseases** that
are common in our
field unless prevented.

**Each of our vacuum
cleaners is fitted
with a class M filter
as standard**, our first
commitment to protect
the worker, and more.

EARTH'S
RESOURCES
ARE
BECOMING
MORE
VALUABLE
THAN EVER

ONE VACUUM ONE TREE

Trees are our planet's natural filters: they absorb C₂ and produce oxygen.
They are earth's true vacuum cleaners; for this reason, there is a **Depureco
forest** with more than 3000 trees, one planted for every vacuum
cleaner sold, in order to help us and future generations to breathe better.
