

## Klinmak's History and Values

Klinmak, srl is a new and exciting Company founded by cleaning experts, with many years of successful global experience in the professional cleaning industry. Established in 2014 and operating out of a new facility in the Milan, Italy area, Klinmak has designed and manufactured a range of industry leading compact ride on scrubber dryers.

From the beginning, our target was clear: to revolutionize the cleaning industry by creating unique, innovative and value focused scrubber dryers for the professional cleaner.

Accordingly, Klinmak is the first to develop a patented design that allows for one motor to drive both brushes allowing for increased run times (autonomy), quiet operation and a superior cleaning result.

On Juli 2019 Klinmak is excited to introduce a new walk behind scrubber/dryer range. The new range features an ergonomic upright design, 20 and 40L tanks and dual brush heads. The units will also feature **only one motor** to drive both the brushes and the suction motor. This innovative and patented design results in huge increases in runtimes, lower noise levels and productivity gains.

## Usp Klinmak

Klinmak's simple cost-effective designs and advanced manufacturing processes allow for a myriad of benefits to our customers. Some of these benefits are:

- The possibility for you or your customers to select from a wide range of colors (10) to personalize your product and accentuate your brand
- Low maintenance and service costs due to our use of high quality, tested and proven components
- Affordable price points due to our simplified component approach
- A diverse potential customer base due to our excellent cleaning result, compact size, lithium ion battery set and ergonomic upright design (supermarkets, work areas, industry, educational facilities, health care, public buildings, and more!)
- Expert service and support training with our first deliveries. We are with you every step of the way to ensure your success
- A low noise footprint allows for day cleaning in sensitive areas.
- Clean and virtually no maintenance Lithium Ion batteries saves end users both time and money
- A perfect solution for an owner or renter fleet

### **TRION 2040 (20L-5G 2X8"-406mm)**

Klinmak is proud to introduce our new walk behind scrubber dryer line; the TRION 2040. The TRION is a significant step ahead in the development of compact walk behind scrubbers by reducing the number of motors required to drive the brushes and the vacuum suction motor. Klinmak's designers have developed an innovative power unit consisting of one only motor to drive both the dual brush head and vacuum suction motor. The benefits to the end user are enormous resulting in a lower overall energy consumption, a high increase in run time and battery autonomy, and an extremely low level of noise.

The TRION 2040 is the perfect solution for cleaning areas between 250 to 750 sqm. The upright design, low power consumption (0.14 W/sqm) and low noise scrubber dryer will make your productivity soar.

**TRION 4050 (40L-10G 2X10"-508mm)**

Klinmak is proud to introduce our latest walk behind scrubber dryer the TRION 4050. This new scrubber uses our patented and innovative Klinmak "Power One" single motor drive system to provide superior cleaning, long run times and industry leading noise reduction in one compact unit.

The TRION 4050 is an upright, compact scrubber driven by a single motor to provide scrubbing and suction power. This ground breaking and patented design provides huge benefits in lower energy consumption and noise levels while maintaining a superior cleaning result.

The TRION 4050 with its upright ergonomic design and low environmental impact is perfect for all general scrubbing needs especially tight areas and areas where noise reduction and day cleaning are paramount.

Try the TRION series and you will be convinced!

## **USP TRION RANGE**

- **Twin brushes 300 rpm : much better cleaning result in comparison to a single brush .**

**Directional control by the operator, common on single brush, is no more necessary,**

- **Lithium Battery, as none in 40L and few in the 20L.**
- **Runtime up to 3h, 1.000 charging cycles : 3.000 working h, with just one battery.**
- **Fast charge : 2 – 4 h max depending by charger.**
- **Possibility to use the machine many times per day. If necessary (up to 9h on 2 shifts).**
- **The shortest, the narrower, the lightest : the most manageable in narrow spaces.**
- **The most silent (vacuum motor is missing).**
- **Clean close to the wall easily.**
- **Only 2 switches: main for cleaning and vacuuming, second for adjusting the water/solution flow.**
- **Display easy with counthour, battery diagnostic, setting in Eco or Max mode . Dosing system (KiDo) on request.**
- **The best Ratio Power Need / Productivity worldwide (0,14 W/mq).**

### **Compact ride on scrubber dryer HILO8065 (80L-2X13"- 660mm)**

HILO8065 is an innovative compact ride on scrubber dryer, battery driven 24V, for cleaning surfaces from 1500 to 5000 free sqm. The min. productivity is about 2.000 sqm/h.

The brush head with two brushes it allows a perfect cleaning result due also to the a smart cleaning pressure on the floor (up to 41 kg) . The machine can be used for maintenance and also deep cleaning on any kind of surfaces (tiles, cement, linoleum, marble, etc..) and any kind of dirty.

HILO8065 is confortable due to the power steering ; the brush head, in front of the machine, gives to the operator a perfect visibility of the cleaning job, clean the corner and edges without any manual step.

Average runtime over 3 h. The peculiar design, thanks to a very innovative patent, allowed a strong reduction of the energy consumption and the complexity; the result is one machine with the productivity of a ride on but the cost of the walk behind.
