ARISTON GETS A NEW LOOK

IGEAX is the new face of Ariston Cleaning Solutions, a historic family-run company that has been producing brooms since 1939. The company has always stood out for the quality of its products, and is known in the international market with the name of its first brand, Aricasa. Continuously renewed in its products and production techniques, the company has come to expand and export the popularity of its brands all over the world, becoming a reference point for the production of professional and cutting-edge cleaning items.

THE IDENTITY THAT COMES FROM CLASSICAL CULTURE

In the Olympus of the Greek-Roman gods, the name Igea was associated with the goddess of health and hygiene: the name IGEAX derives from it.

But it's not just a simple name: IGEAX's visual identity also reflects the search for order, perfection and elegance typical of classical culture.

IGEAX products are in turn influenced by this refined and attractive style, with attention to the smallest details, almost as if to imitate the wonderful works of art of the Hellenistic period.
