

♻️ Reduce your plastic footprint ♻️

We all care about the environment. Vision Shuffle Hand Hygiene refills made from aluminium are a truly sustainable hand washing solution and can help the Hygiene Sector reduce the impact of single use plastic waste on the environment.

VISION SHUFFLE ALUMINIUM REFILLS

Shuffle Aluminium refills can be melted down and reused an infinite number of times with no loss of quality

89% of all aluminium is recovered and recycled in Europe

No exporting long distances to suitable recycling plants

Sorting and recycling aluminium is an easy, sustainable, low energy process and rates as one of the least polluting of all materials when recycled

SINGLE USE HAND SOAP PLASTIC BAG & BOTTLE REFILLS

Plastic can only be recycled two or three times before its quality level degrades

Only 30% of all plastic is recycled in Europe. 31% of this ends up in landfill

Most plastic waste is exported to developing countries for recycling

Sorting and recycling plastics can be difficult and costly process so a lot of plastic ends up in landfill or being incinerated

Vision Shuffle refills **100%**
MORE ENVIRONMENTALLY FRIENDLY
than traditional single use plastic bag & plastic bottle soap refills
WITHOUT COSTING THE EARTH
