

Frightfully strong – FloorZilla hybrid cleaning pads

The impressive cleaning performance of FloorZilla hybrid cleaning pads has numerous positive effects. Cleaning experts can save on time and costs, and, due to the pads' gentle cleaning properties, have a sustainable positive impact on the quality of the floors being cleaned. When used in combination with rotating and oscillating monodisc machines as well as scrubber dryers, FloorZilla's special structure cleans floors effectively and cost-efficiently without causing any impairment or damage to the surfaces. And it does all of this 100% chemical-free. Sustainable production, developed and manufactured in Germany.

Concentrated power and competence

Higher cleaning performance, gentle to floors

Longer service life: up to 50,000 m²

100% chemical-free

Increased cost-efficiency

Made of recycled material.

**Unleash the power of FloorZilla.

FloorZilla is effective, cost-efficient and impresses thanks to its extremely long service life. Let our starter kit convince you under www.floorzilla.de.

Product information

FloorZilla hybrid green, yellow, red, black

Product details

Height	approx. 20 mm
Diameter	8 -20 inches
Material	Nonwoven fibres, foam material
Number of pieces	3 pcs (sales unit)

Use with floor cleaning machines

FloorZilla cleaning pads are suitable for use with oscillating and rotating monodisc machines as well as scrubber dryers.

Sustainable cleaning in every particular

With FloorZilla, cleaning experts make a sustainable contribution to protecting the environment, then FloorZilla hybrid cleaning pads remove dirt completely without the use of chemicals. Water consumption is reduced by up to 70% compared to other cleaning pads. This sustainable cleaning process is made possible by the special VreactiV technology. This also ensures an extremely long service life and a therefore particularly durable product made from recycled PUR foam.

Floors

FloorZilla hybrid is suitable for use on both hard and resilient flooring:

- Natural stone
- Terrazzo
- Marble
- Screed/concrete
- Epoxy
- Industrial flooring
- Polyurethane
- PVC

VreactiV technology

Deep-cleaning but also gentle: The unique VreactiV technology cleans floors efficiently and is gentle to surfaces. Due to its specially developed 3-layer structure, contact pressure is distributed in the FloorZilla hybrid cleaning pads efficiently and evenly across the 3D active surface. This contains SiC microgranules, held in a flexible binding, which remove dirt efficiently and gently. Let our VreactiV technology impress you!

Higher contact pressure

The five 3D active elements in FloorZilla hybrid cleaning pads not only mean optimum pressure distribution, but also ensure a higher contact pressure. The raised 3D active elements allow for 300% higher contact pressure and can therefore remove even the strongest, most persistent dirt.

Optimum use

FloorZilla Cleaning pad	Dirt	Maintenance cleaning Basic cleaning	Dry polishing Wet cleaning
