Designed to deliver a tailor made cleaning solution

Problems

- Effective cleaning is highlighted in reports as key to reduce Community & Health Acquire Infections. But it is difficult to monitor and control with inefficient practices and routines
- High staff turnover up to 70% in the facilities services segment and others. This means effective cleaning protocol is difficult to control and execute
- Not having good cleaning practices has a bad effect on business' and reduces productivity. Having a clean establishment has been shown to increase productivity by 2-8%

Solutions

- Impregnated wipes are proven to be the most consistent way to reproduce results
- With S.U.D.S. you tailor your chemical & wipe, improving performance & reducing time. Impregnating yourself has shown to reduce the cost vs. pre-saturated wipes***
- Impregnating on demand reduces risk of chemical expiration & improves efficiency
