

AUTOMATIC HAND SANITISING

The perfect solution for maximum hygiene

Kennedy's stand is designed for use with the automatic hand sanitising dispenser Savona Ellipse Auto.

This practical stand is suitable for reception areas. Users can quickly sanitise their hands with the anti-bacterial gel when entering or leaving your building. With its compact size and stylish design, it can be placed within key locations to ensure your employees and customers are safe and protected from the spread of germs.

The electronic dispenser enables hands-free operation to prevent cross-contamination, and the patented one-way valve prevents the hand sanitiser from returning to the cartridge.

INTEGRATED HYGIENE SOLUTIONS

AUTOMATIC HAND SANITISING

The perfect solution for maximum hygiene

SANITISING STAND

The stand is made of powder coated mild steel and is easy to assemble.

With its compact and attractive design, the hand disinfection stand takes minimal floor space.

AUTOMATIC DISPENSER

The Savona Ellipse Auto provides an ultra-hygienic solution for hand sanitising. Based on capacitive sensing and combined with a fast dose delivery, it provides user-friendly experience.

It is robust and reliable dispenser with long lasting batteries, which means running costs are extremely low.

SANITISING GEL

The hand sanitising gel comes in a large capacity 1000ml cartridge. This hydroalcoholic gel is fragrance-free and it meets EN1500 anti-microbial standards.

The hand disinfection stand, automatic dispenser and sanitising gel are sold separately. Contact the Kennedy sales team to place an order.
