

**SpaceVac High-Level Cleaning Systems
Illustrated Catalogue**

It is with great pleasure that we present the range of **SpaceVac High-Level Cleaning Systems**.

As our footprint throughout the world continues to grow, so to has our commitment to safety and innovation; leading to a range of 15 high-level cleaning systems - each designed to provide a range of options for partners and clients across a range of business sectors and price points.

In addition; our team of engineers have been hard at work developing a range of new add-ons and accessories, such as our new Explorer Camera System and the new Spacesuit which enhance and extend the range and performance of SpaceVac in your day to day activities.

Be sure to book a demo of **SpaceVac** today and see for yourself how you and your team could be working higher, safer & faster!

British Engineering. Global Issues.

SpaceVac are the world's leading manufacturer of high-level vacuum cleaning and inspection systems.

The SpaceVac system was first invented over a decade ago and since then, continuous research and development has led to a range of 15 unique systems that are revolutionising high-level cleaning.

The system was first introduced as a way of helping cleaners to clean blocked guttering from the ground floor. Following increasing customer demand however, this product has since been expanded to develop new lines for use in internal dusting, the removal of hazardous combustible materials and even cleaning in specialist environments.

Since our products were first launched onto the market, they have helped some of the biggest businesses in the world overcome the unique challenges associated with high-level cleaning.

Universal Cleaning Solutions to Unique Cleaning Challenges.

High-level cleaning is an area that affects almost all businesses - albeit often in different ways. Over time, accumulated dust can not only visually impact the environment

inside a building but also create and aggravate health complaints for people living and working within the space.

For some businesses - their high-level requirements are external - with a need to clear blockages from guttering and downpipes before leaks can cause damage to the building itself.

For some clients however - material gathering at heights creates even more dangerous concerns. Left unchecked, dust accumulating in cable trays and lighting systems can lead to overheating and fires breaking out. Meantime, in specialist ATEX rated areas such as bakeries, woodmills or specialist manufacturers, then this risk can be deadly - with the accumulated dust serving as a highly combustible fuel source in the event of a fire or explosion.

Loved by Cleaning Teams and Accountants Alike

By introducing a simple to use, floor operated solution to these problems, SpaceVac not only presented cleaning teams with a safer way to conduct their work - by removing the need to work at height - but its introduction also offers a number of unique benefits to our clients.

Our interlocking high-level pole systems remove the need for additional access equipment that would previously have been required. These items - such as scaffolding, ladders or hydraulic lifts - not only require multiple members of staff to operate but are also expensive and time consuming to set up and move around a facility.

The simple removal of these items from cleaning regimes means operators can complete cleaning work in a fraction of the time and substantially cheaper than they could utilising traditional cleaning methods.

In addition - the small footprint and non-disruptive nature of the system means cleaning work has less impact on operations - reducing downtime and increasing productivity.

All of our products are proudly manufactured in the UK with our focus on innovation and improvement continuing to deliver high-quality, innovative new products for our clients around the world.

Scan to browse a range of Case studies from Ikea, Tesco and more at our website!

Innovation. Not Imitation.

Since our line of high-level cleaning systems first entered the marketplace, our engineering team have continued to develop, adapt and refine our systems.

Today our range includes 15 different cleaning systems - all manufactured in the UK - designed to suit a range of different cleaning environments and price points - as well as a full range of specialist systems, accessories, add-ons and ancillary products.

The core lines within the SpaceVac range are our Internal, ATEX and External systems - each comprised of a full hose kit*, pole kit and range of cleaning tools and brushes. Available at a range of price points - from our entry level **LITE** system to our market leading **ULTRA** system - the range all feature our unrivalled build quality and come equipped with our unique safety locking mechanism as standard.

Joining the SpaceVac range are a number of specialist systems all designed with very specific purposes in mind. The first - an ATEX approved **Food Safe Cleaning** system with FDA cleaning accessories suitable for use in Food and Drink manufacturing facilities - where the highest standards in cleanliness and hygiene are a must.

This exciting addition is joined by our **High-Voltage** pole system [Rated

as capable of withstanding up to 50,000 volts] for use in high-voltage trackside environments and a unique **Museums and Fine Art** accessory pack designed to provide soft touch, non-abrasive cleaning of old and delicate items.

In addition, our team have also worked hard to create a range of supporting add-ons and accessories to enhance and add further functionality to our products.

In late 2020 we were delighted to unveil the new **Explorer Camera** system - a game changing new development in camera and monitoring technology offering unrivalled quality and specifications [First utilised on the NASA / Orbital Sciences Space Mission]. The new camera system boasts a 9 hour battery life, 12MP photos and 1080p recording as well as a unique remote access function to allow sharing of feed with offsite colleagues.

Putting the Vac in SpaceVac

As we enter 2022 - the latest addition to the SpaceVac range is our brand new line of Spacevac vacuum cleaners; designed to provide the perfect companion to any SpaceVac high-level cleaning system.

Hand built by a team of vacuum specialists to our exacting

specifications, the newly released trio of vacs are engineered to provide a powerful cleaning performance in any area.

The new SpaceVac line features three systems. The first is the new **Endeavour**; a dual motor system designed for removing high-level dust and other materials from internal areas.

Moving up the range, users looking to clean internally and externally, will look to our new **Hurricane** wet / dry vac - living up to its moniker with three independent motors providing powerful suction and airflow for cleaning with our Internal and External cleaning systems.

Finally; operators working in ATEX certified areas such as industrial manufacturing facilities or bakeries, can now also utilise the new **SpaceVac TITAN and TITAN 2 Vacs**. The centrepiece of our Vacuum line, the Titans are new ATEX certified vacuum units safe for use in these highly specialised environments in conjunction with our range of conductive, full Carbon cleaning systems.

In addition to their impressive specifications [see over] all of these exciting new vac system are also fitted with new "Tool Holders" for easy storage and access to SpaceVac poles and tools when cleaning - another innovative new design feature.

Innovation not Imitation

The future looks bright for #TeamSpaceVac: Our focus on developing new and innovative products with our UK manufacturing

team means a number of exciting new products are already being readied for launch.

Among these new developments are the launch of our new entry level **EXTERNAL LITE** system for window cleaners and other businesses looking to get started with gutter cleaning. This new product is joined by a new ATEX certified version of our **Explorer Camera** [The **EXplorer**], and the latest addition to our stable of cleaning innovations; the launch of our new **Titan 2** vacuum, 2.2kw, which will be available in 230 volt x 16 amp and 110 volt x 32 amp versions for use in combustible environments with our ATEX cleaning systems.

Book a demo of any of our high-level cleaning systems or vacuum today - visit the website at spacevacinternational.com

A woman in a red jacket is using a long-reach cleaning tool to clean a large window of a modern building. The interior of the building is visible through the window, showing a wooden wall and a potted plant. The scene is set in a modern building with large glass windows and a wooden interior.

INTERNAL CLEANING

Contents:

- Internal 38mm Lite
- Internal 38mm Pioneer
- Internal 38mm Classic
- Internal 38mm Pro
- Internal 38mm Ultra
- Internal Museums Pack
- Under Racking Kit

The SpaceVac Lite cleaning system is a low-cost entry level product for occasional use and teams only requiring a few metres of additional reach.

Ideal for use in domestic settings as well as light commercial use such as smaller retail units or office space where the removal of dust is critical to not only cleanliness, but also the health of employees working within the space.

Featuring our unique "safety locking mechanism" the **SpaceVac Lite** system is capable of reaching over 4m in height and can be fully accessorised with a range of additional add-on tools to give users increased flexibility.

Product Focus: 38mm Internal Lite

No of Poles: 3
Material: Glass Fibre
Working Height: 4.75m
Length of Enclosed Poles: 3.75m
Pole Diameter: 38mm
Pole Length: 1.25m
No of Heads: 1
No of Brushes: 2
Hose Kit Included: No

Accessories & Add-Ons available:

Be sure to check out our the range of extra tools and brushes you can add to your Spacevac on Page 22

What's Included: SV38/LITE

Each 38mm SpaceVac Lite system comes with the following items included as standard:

3 x SV38/125-LITE
3 x 38mm x 1.25m
LITE Pole

SV/LPB
1 x Lite Pole Bag

SV38/32HA
1 x 32mm Hose to

Disney

The Pioneer system is designed to fill the gap between our budget friendly, entry-level LITE system and the bigger, more powerful systems available elsewhere in the range.

Reaching over 6m in height from the safety of the ground floor, the Pioneer system has been designed for users looking for a little extra reach and functionality in their SpaceVac system.

Often paired with a backpack vacuum, the unobtrusive working method, means that our easy to deploy system allows maintenance to be carried out with minimal disruption to personnel in the area.

Product Focus: 38mm Internal Pioneer

No of Poles: 3.5
Material: Glass Fibre / Carbon Fibre Composite
Working Height: 6.6m
Length of Enclosed Poles: 5.6m

SV/HB
 1 x Hose Bag

Operators looking to reach increased heights turn to the SpaceVac Pro 38mm system for heavy duty performance.

In developing our Pro poles, SpaceVac's engineering team faced a unique challenge - how to increase the reach of the SpaceVac system without compromising operation.

By employing advancements in Carbon engineering technology, the team developed a new carbon fibre blend; utilising increased amounts of carbon to produce a cleaning pole that not only reduced the individual pole weight (crucial when adding additional poles to reach increased heights) but also improved the rigidity of the complete system to ensure improved stability - even at full height.

Product Focus: 38mm Internal Pro

No of Poles: 7.5
Material: Carbon Fibre
Carbon Weave: 4k Full Carbon Fibre

Internal Vacuum: SpaceVac Endeavour

SV/Endeavour
2 Motor Standard Vac

The SpaceVac Endeavour is a powerful twin motor vacuum cleaner for excellent suction and easy removal of high-level dust and dirt from internal settings.

- Two single phase brush motors double stage by-pass
- Painted version with trolley in RAL 9005 black, container and filter chamber in RAL 7001 grey
- Motor-head in ABS/metal black coloured
- Independent switches for each motor
- Vacuum-meter to check the filter efficiency
- 9m Long Electrical Cable
- Star filter in polyester cat. "L"
- Manual filter shaker on top of the vacuum
- Quick inlet Ø70mm
- Dust bin of 25l provided with handle and castors
- Rear castors Ø125mm, front castors Ø100mm with brake
- With special support for SpaceVac tools

Specifications:

Endeavour 230V

- 2 brush motors, single-phase
- 2200 WATT [2,2 kW]
- 230V. 50/60 HZ.
- 210mbar
- 340 m3/h
- 16a CEE industrial plug- UK patch lead added for 13 amp use

Endeavour 110V

- 2 brush motors, single-phase
- 2000 WATT [2,2 kW]
- 120V. 50/60 HZ.
- 210mbar
- 340 m3/h
- 16a CEE industrial plug

Working closely with our specialist manufacturing centre, our engineering team have developed and tested a system packed with new features and cutting edge camera technology.

The resultant system is one of the most powerful, flexible and efficient camera system available anywhere in the specialist cleaning marketplace.

The **EXPLORER** system packs a range of innovative new features including our unique remote access function; allowing for real time streaming to anyone, anywhere in the world!

Product Focus:

Stills: 12mp
Records At: 1080p HD
Battery Life: 9 hours
Waterproof: Yes
Waterproof Connections: Yes
Low Light Mode: Yes
Compatible with other devices: Yes
Remote Access Mode: Yes

COMING SUMMER 2022:

Coming soon; our new ATEX rated **EX**plorer Camera and Monitoring system for use in specialist combustible environments!

What's Included: SVCAM/EXPLORER-KIT

Each SpaceVac Explorer system comes with the following items included as standard:

SVCAM-EXPLORER
Waterproof Explorer Camera

SVCAM-OBSERVER
1 x Phone Monitor

2 x SVCAM-CLAMP
2 x Camera and Monitor Tube Clamp

SVSCREEN-MOUNT
1 x Screen Mount

Under Racking Kit SV50/URKIT

Our unique **Under Racking Kit**, allows for the simple use of SpaceVac at ground level - allowing fast and easy removal of dust and other materials from floors that would otherwise be inaccessible due to the presence of racking or built in machinery that would preclude traditional cleaning methods.

Built around a core of our 50mm poles to allow for maximum airflow and high-powered cleaning performance **EVERY** time.

The SpaceVac Spacesuit is a brand new cleaning add-on designed to make the use of SpaceVac even more comfortable for operators.

The lightweight but durable support brace, spreads the weight of the system evenly across operators shoulders and backs to make even long, heavy duty cleans much more comfortable and with less strain on the back, neck and shoulders.

The system also includes a pair of prismatic glasses to allow operators to easily monitor progress of cleans without needing to look upwards - helping to avoid operators straining their neck and making SpaceVac even more comfortable to work with.

In addition to being compatible with any of the SpaceVac high-level cleaning systems in our range, the new Spacesuit is also compatible for use with any telescopic inspection or even high-reach, water fed window cleaning pole systems making it an attractive add-on to facilities managers who offer these additional services in their portfolio.

Our External Cleaning System is a simple, durable system for the cleaning and maintenance of guttering and downpipes - capable of reaching up to a height over 11 metres from the safety of the ground floor.

The cleaning and regular maintenance of these guttering areas, is an often overlooked but crucial part of any building management plan; as blocked guttering can lead to leaks, structural damage to the property, and even health problems for the occupants within.

Given its almost universal application, our External system has rapidly found a home in stadiums, schools, colleges, warehousing facilities and many other sectors worldwide.

The SpaceVac Universal system is a flexible cleaning system designed for use in internal and external settings.

The Universal system features a full 50mm set of cleaning poles and gutter cleaning tools, along with a unique 50-38mm adaptor and a full set of our 38mm internal cleaning heads to take the system inside for removing high-level dust and other materials from height.

The system is a powerful ally to anyone working in the Facilities Management fields working across a diverse range of areas or looking to add multiple new products to their service lines.

Product Focus: 50mm Universal System

No of Poles: 6.5
Material: Carbon Fibre / Glass Fibre Composite
Carbon Weave: Unidirectional
Working Height: 11.4m
Length of Enclosed Poles: 10.4m
Pole Diameter: 50mm
Pole Length: 1.6m
No of Heads: 5
No of Brushes: 5
No of Tools: 4
Hose Kit Included: Yes
Hose Diameter: 50mm

[Hose pictured for illustrative purposes - length of hose varies by system.]

What's Included: SV50/UNI

Each 50mm SpaceVac Universal system comes with the following items included as standard:

6 x SV50/16-Classic
 6 x 50mm x 1.6m Classic Pole

SV50/08-Classic
 1 x 50mm x 0.8m Classic Half Pole

SV/PB
 1 x Padded Pole Bag

SV50/38CT
 1 x Crevice tool

SV50/135H
 1 x 135 Degree Head

SV50/50ST
 1 x 50mm Spike Tool

SV50/38RT
 1 x 38mm Round Tool

SV50/38ST
 1 x 38mm Spike Tool

SV50/75H
 1 x Hose x 7.5m

SV50/HA
 1 x 50mm Hose to Pole Adapter

SV50/50HC
 1 x 50mm Vac Inlet Cuff

SV/HB
 1 x Hose Bag

SV38/120B
 1 x 30cm Ducting Brush

SV38/45H
 1 x 45 Degree Cleaning Head

SV38/90H
 1 x 90 Degree Cleaning Head

SV38/135H
 1 x 135 Degree Cleaning Head

Universal System Inventory (cont)

SV38/STR
1 x Straight Cleaning Head

SV38/15SW
1 x 38cm Large Flexi Brush

SV38/FLT
1 x 30cm Flat Surface Tool

SV38/85W
1 x 20cm Small Flexi Brush

SV38/SRB
1 x Small Round Brush

SV50/38PA
1 x 50mm to 38mm Adaptor

SV/MB
1 x Mesh Bag

SV50/SS
Protective silicon sleeve

SV50/BRT
Branch trimming tool

Also Available:

SV50/K-HA
Hose to Karcher barbed inlet

SV50/50RT-CO
50mm composite gutter tool round end

External Vacuumn - SpaceVac Hurricane

SV/Hurricane
3 Motor Standard Vac

The SpaceVac Hurricane is a brand new, custom designed triple motor wet/dry vacuum capable of delivering powerful cleaning performance inside or out.

- Three single phase brush motors double stage by-pass
- Painted version with trolley "LIGHT VERSION type" in RAL 9005 black, container and filter chamber in RAL 7001 grey
- Motor-head in ABS/metal black coloured
- Independent switches for each motor
- Vacuum-meter to check the filter efficiency
- 9m Long Electrical Cable
- Star filter in polyester cat. "L" Ø460mm
- Manual filter shaker on top of the head
- Quick product inlet Ø70mm
- Dust bin of 65l with integrated handle and castors
- Rear castors Ø150mm, front castors Ø125mm with brake
- Without accessory basket in front
- With special support for SpaceVac tools

Specifications:

230V Triple Vac Motor

- 3 brush motors, single-phase
- 3300WATT (3,3 kW)
- 230V. 50/60 HZ.
- 225mbar
- 510 m³/h
- 16a CEE industrial plug

120V Triple Vac Motor

- 3 brush motors, single-phase
- 2300 WATT (2,4 kW)
- 120V. 50/60 HZ.
- 200 mbar
- 450 m³/h
- 16a CEE industrial plug

High-Voltage Cleaning System

Tested and certified to ATEX standards; our Atex LITE Cleaning System is a perfect introductory system for occasional users and operators cleaning at low levels in Atex areas.

Recognising that not all specialist atmospheres have to be huge spaces, the Atex LITE system has been developed for entry level users and teams with occasional cleaning requirements above head height.

In developing a smaller variant of our 38mm cleaning pole, SpaceVacs engineers have created the perfect beginners SpaceVac pole - offering a lightweight package with dependable robust construction to offer peace of mind to operators.

Product Focus: 38mm Atex Lite

No of Poles: 3
Material: 100% Carbon
Carbon Weave: Full 4k Carbon Fibre
Working Height: 4.75m
Length of Enclosed Poles: 3.75m
Pole Diameter: 38mm
Pole Length: 1.25m
No of Heads: 2
No of Brushes: 1
No of Tools: 1
Hose Kit Included: Yes
Hose Diameter: 38mm

[Hose pictured for illustrative purposes - length of hose varies by system.]

Conductive - A conductive tool has a volume resistance <104 ohms. It may have a conductor built in. For use in general non-hazardous areas and explosive atmospheres - Atex zones 1, 2, 21 and 22

What's Included: SVA38/EX-LITE

Each 38mm SpaceVac Atex Lite system comes with the following items included as standard:
Independently certified to be compliant with the Atex Directive 2014/34/EU: ISO 80079-36:2016 and ISO 80079-37 and NFPA Certified.

3 x SVA38/125-LITE

Some of our Clients Include:

The Atex Pioneer has been specifically launched to fill a gap in the Atex cleaning line.

Tested and certified to Atex standards; the Atex Pioneer offers operators over 6 metres of reach from the safety of the ground floor, allowing operators to safely remove combustible materials such as wood, flour or paper from above head height.

The system was designed to sit in the SpaceVac range between our entry level **Atex Lite** system and the more advanced heavy duty products elsewhere in the line such as our **Pro** and **Ultra** lines and is all manufactured in fully conductive 100% Carbon Fibre.

Product Focus: 38mm Atex Pioneer

No of Poles: 3.5

COMING SUMMER 2022:

Coming soon; our new ATEX rated **EXplorer** Camera and Monitoring system for use in specialist combustible environments!

Our 38mm Atex cleaning poles were a world first when they first entered the combustible market in 2016.

Developed in response to a number of deadly incidents involving the use of incorrect cleaning equipment in explosive atmospheres, SpaceVac sought to engineer a system safe for use in these specialised environments.

Manufactured to the highest standards right here in the UK - our Atex poles are made from 100% Carbon Fibre and are tested and certified to Atex standards.

The system is fully accessorised with a range of Atex and anti-static accessories for flexible cleaning options.

Product Focus: 38mm Atex Pro

No of Poles: 5.5
Material: 100% Carbon Fibre
Carbon Weave: Full 4k Carbon Fibre
Working Height: 9.8m

Our new Atex Ultra cleaning poles are the new standard in high-level cleaning worldwide; utilising cutting edge carbon engineering techniques to create our lightest, most durable pole ever.

Designed to provide a cleaning system with the ability to reach heights up to 15m as standard - with the ability to reach over 20m when extended - the new **Atex Ultra** range provides unrivalled build quality and performance - delivering a pole that is lighter than our pro pole, with increased rigidity and an even stronger carbon weave.

The result of these developments in carbon engineering technology is a pole that can scale heights of over 15m from the safety of the ground floor.

Product Focus: 38mm Atex Ultra

No of Poles: 9.5
Material: 100% Carbon
Carbon Weave: Full 12k Carbon Fibre
Working Height: 16m
Length of Enclosed Poles: 15m

The manufacture of Food & Drink is one that requires the very highest standards in cleanliness.

The risks of cross-contamination and the integrity of the wider food chain, mean that cleaners and facilities managers have a requirement to easily remove these by-products from within their premises as well as the pests attracted by these products.

By developing a specialist food and drink safe version of our cleaning system - featuring a range of FDA approved cleaning heads - SpaceVac has created a unique solution for cleaning above head height. With materials like dust and flour often dispersing and settling on high level areas, our Food Safe system easily reaches these otherwise inaccessible areas to remove these materials quickly and safely.

Product Focus: SpaceVac Food Safe

No of Poles: 5.5
Material: 100% Carbon
Carbon Weave: 12k Woven Carbon Fibre
Working Height: 9.8m
Length of Enclosed Poles: 8.8m
Pole Diameter: 38mm
Pole Length: 1.6m
No of Heads: 4

SV/SB-*
10 x Silicon Bands

Designed for power users operating in the most extreme of cleaning environments, our 50mm Atex PRO cleaning poles are the next evolution in cleaning.

Developed in response to customer demand from operators who were cleaning in extreme heavy duty environments, our 50mm cleaning poles offer an increased operating diameter to users, to increase airflow when cleaning at height - even when removing heavy duty blockages such as sawdust, wood shavings or metal filings.

Engineered to the highest standards in the UK - our 50mm poles are manufactured to a high grade 100% carbon formula right here in our brand new U.K manufacturing facility - and are all tested and certified to Atex standards.

Product Focus: 50mm Atex Pro

No of Poles: 6.5
Material: 100% Carbon

Atex Vacuum: SpaceVac Titan

The New SpaceVac TITAN is a efficient ATEX certified vacuum cleaner safe for use in the removal of zone 22 dust [group II, category 3D]

This revolutionary new ATEX Vacuum system offers a fully conductive single motor solution, designed to provide powerful suction for use with our Conductive Atex cleaning systems.

- Single phase motor asynchronous marked ATEX EX II 3D
- Trolley in RAL 9005 black, container in stainless steel and filter chamber in RAL 9003 white
- Vacuum-meter to check the filter efficiency
- Electric cable 10m long with industrial plug 2P+earth 16A IP67 marked ATEX
- Star filter in polyester cat. "L" antistatic
- Manual filter shaker on side
- Quick inlet Ø70mm
- Relief valve put in as standard
- Dust bin of 25l provided with handle and castors
- Rear castors Ø125mm, front castors Ø100mm with brake, antistatic
- With special support for SpaceVac tools

Specifications:

Titan 230v / 1.5kW

- 1,5 kW turbine, single phase 230V. 50/60 HZ.
- 200 mbar
- 200 m³/h
- 16a CEE industrial plug- UK patch lead added for 13 amp use

Titan 230v / 2.2kW

- 2,2 kW turbine, single phase 230V. 50/60 HZ.
- 170mbar
- 405 m³/h
- 16a CEE industrial plug- UK patch lead added for 13 amp use

- 170mbar
- 405 m³/h
- 32a CEE Industrial plug

Our unique High-Voltage safe range of cleaning poles and tools have been specifically designed for use in extreme high-voltage areas where use of a regular SpaceVac would be prohibited.

Designed and manufactured here in the UK and tested and developed in collaboration with the University of Manchester, this new generation of SpaceVac poles and tools have been tested and independently certified as being capable of withstanding voltages up to 50,000v to enable operators to take our revolutionary high-level cleaning systems and put them to work in areas such as trackside, underground or working near overhead powerlines.

Product Focus: SpaceVac High Voltage

No of Poles: 6
Material: Non Conductive Glass Fibre
Working Height: 9.4m
